 This statement of Common Ground is agreed upon:11

1. Introduction

1.1. Overview

- 1.1.1. This Statement of Common Ground ('SoCG') has been prepared on behalf of Rosefield Energyfarm Limited ('the Applicant') in relation to the Development Consent Order (DCO) application for the construction, operation and decommissioning of Rosefield Solar Farm (hereafter referred to as the 'Proposed Development').
- 1.1.2. Rosefield Solar Farm (the Proposed Development) is a proposed new solar farm and battery storage facility located in Buckinghamshire. The proposals also include infrastructure to connect the Proposed Development to the National Grid East Claydon Substation, as well as any necessary supporting site infrastructure and environmental mitigation, including landscaping and ecological planting.
- 1.1.3. The SoCG is being submitted to the Examining Authority as an agreed document between both parties. It will be amended as the examination progresses in order to enable a final version to be submitted to the Examining Authority.
- 1.1.4. The SoCG has been updated following a discussion with Buckinghamshire and Milton Keynes Fire Authority (BMKFA) in April 2026 to reflect the position against the items within the tracker. All items have now been discussed and the position 'Agreed'.

1.2. Parties to this Statement of Common Ground

- 1.2.1. This SoCG has been prepared by the Applicant and Buckinghamshire and Milton Keynes Fire Authority (BMKFA).
- 1.2.2. BMKFA is a non-statutory stakeholder defined for the Rosefield Solar Farm Development Consent Order application.

Buckinghamshire Fire & Rescue Service serves the area covered by Buckinghamshire Council and Milton Keynes City Council. BMKFA is responsible for making decisions on policy, finance, and resources.

- 1.2.3. Collectively, the Applicant and BMKFA are referred to as 'the parties'.

1.3. Purpose of this Document

- 1.3.1. This Statement of Common Ground ('SoCG') is being submitted to the Examining Authority as an agreed document between both parties. This SoCG is a 'live' document and will be amended as the examination progresses in order to enable a final version to be submitted to the Examining Authority.

- 1.3.2. The SoCG has been prepared in accordance with the Department for Levelling Up, Housing and Communities’ Guidance on the examination stage for Nationally Significant Infrastructure Projects (‘DLUHC Guidance’).
- 1.3.3. Paragraph 007 of the DLUHC Guidance comments that:
“A Statement of Common Ground (SoCG) is a written statement prepared jointly by the applicant and another party or parties, setting out any matters on which they agree, or indeed disagree. A SoCG helps to ensure that the evidence at the examination focuses on the material differences between the main parties and therefore makes best use of the lines of questioning pursued by the Examining Authority’.
- 1.3.4. The aim of this SoCG is, therefore, to provide a clear position of the progress and agreement met or not yet met between BMKFA and the Applicant on matters relating to the DCO Application.
- 1.3.5. The document will be updated as more information becomes available and as a result of ongoing discussions between the Applicant and BMKFA.
- 1.3.6. The SoCG is intended to provide information for the examination process, facilitate a smooth and efficient examination, and manage the amount of material that needs to be submitted.
- 1.3.7. This SoCG does not seek to replicate information which is available elsewhere within the Application documents. All documents will be available on the Planning Inspectorate website after submission of the DCO application.
- 1.3.8. Once finalised, the SoCG will be submitted to the Examining Authority concerning the DCO Application under section 37 of the Planning Act 2008 for an order granting development consent for the construction of the Proposed Development.

1.4. Terminology

- 1.4.1. This SoCG summarises the main topics covered and the status of the matter. The colour coding system used within the table in Section 4 has been outlined below.

Cell

Status

Agreed - indicates where an issue has been resolved.

Under Discussion - indicates where points continue to be the subject of on-going discussions between parties.

Not Agreed - indicates a position where both parties have reached a final position that a matter cannot be agreed between them.

2. Proposed Development Description

- 2.1.1. The Proposed Development comprises the construction, operation (including, maintenance), and decommissioning of solar photovoltaic ('PV') development and energy storage, together with associated infrastructure and an underground cable connection to the National Grid East Claydon Substation.
- 2.1.2. The principal components of the Proposed Development include:
- Solar PV development consisting of:
 - Ground mounted Solar PV generating station. The generating station would include Solar PV modules and mounting structures; and
 - Balance of Solar System (BoSS) which comprises: Inverters; Transformers; Switchgear; Combiner Boxes; acoustic barriers and cabling.
 - A project substation (the 'Rosefield Substation') compound comprising: Transformers; Switchgear; reactive power compensation bays; disconnectors; circuit breakers; busbars; control equipment; lightning surge arrestors; building(s) including office, control, functions, material storage, material laydown areas and welfare facilities; firewalls; fencing and acoustic barriers; a security cabin; parking as well as wider monitoring, maintenance and emergency equipment;
 - A Main Collector Compound and two Satellite Collector Compounds comprising: Switchgear; Transformers; ancillary equipment; operation and maintenance and welfare facilities; material storage; material laydown areas; fencing and acoustic barriers; and security cabins;
 - Battery Energy Storage System (BESS) compound comprising: batteries and associated Inverters; Transformers; Switchgear, ancillary equipment and their containers; office, control and welfare buildings; fencing and acoustic barriers; monitoring, maintenance and emergency systems; air conditioning; electrical cables; fire safety infrastructure; operation (including maintenance) security facilities; material storage; and material laydown areas;
 - Interconnecting Cabling Corridor(s) to connect the Solar PV modules and the BESS to the Satellite and Main Collector Compounds to the Rosefield Substation;
 - A Grid Connection Cable Corridor to connect the Rosefield Substation to the National Grid East Claydon Substation via 400kV cabling;
 - Ancillary infrastructure works comprising: boundary treatment; security equipment; lighting; fencing; landscaping; internal access tracks; works to facilitate vehicular access; earthing devices; earthworks; surface water management; utility connections and diversions; and any other works identified as necessary to enable the Proposed Development;

- Green and blue infrastructure, recreation and amenity works comprising landscaping; habitat management; biodiversity enhancement; the creation of three permissive footpaths; and works to permanently divert four PRow Footpaths in five instances;
- Site-wide operational monitoring and security equipment; and
- Highways infrastructure improvements and safety works comprising: minor junction improvement works; road widening; passing places; and works to facilitate vehicular access to the Site.

3. Record of Engagement

3.1. Record of Engagement

- 3.1.1. The parties have been engaged in consultation throughout the early stages of the project. Table 1 shows a summary of key engagement that has taken place between the Applicant and BMKFA in relation to the Application.

Table 1 - Record of Engagement

Date	Form of correspondence	Key topics discussed and key outcomes
7 November 2023	Introduction Meeting on Teams	The Applicant presented slide pack • Confirmed points of contact • Risk identification and mitigation discussed • Return with concept design specifics in 2024 • Lessons learnt from fire authority to be shared
22 October 2024	Written feedback received from BMKFA	Request for emergency response plan. Request for outline battery safety management plan. Outline Battery Safety Management Plan (oBSMP) [EN010158/APP/7.9]
4 December 2024	Teams Meeting	Updates to project given - discussions from phase two consultation feedback
19 August 2025	Teams meeting – Pre DCO submission.	Review of project updates, discussion around draft oBSMP and plume assessment documents. Programme for SoCG.
16 th April 2026	Teams Meeting – Pre SOCG update	Review updates to project, discussion around SOCG.

4. Current Position

- 4.1.1. The following tables set out the position of the Applicant and BMKFA following a series of meetings and discussions with respect to the key areas of the Proposed Development. This includes matters where discussions are ongoing.
- 4.1.2. As noted above, this is a 'live' document, the intention is to provide a final signed position in subsequent versions of the SoCG, addressing and identifying where changes have been made, and ultimately, documenting agreement by both parties on relevant points

Table 2 –Position of the Applicant and BMKFA

Ref	Description of Matter	Stakeholder Comment	Applicant's Response	Status
1	National Fire Chief Council (NFCC) Guidance for design of Battery Energy Storage System (BESS) sites	BMKFA continues to assess the project proposals referencing the relevant NFCC benchmarking and national guidance for the BESS infrastructure.	The Applicant confirms that the National Fire Chiefs Council (NFCC) Grid- Scale Battery Energy Storage System Planning Guidance for FRS (2026) is being used as a fundamental input to develop the design from the start. It will continue to be an input throughout the Applicant design stages into construction and operation (including maintenance) phases.	Agreed
2	Battery Energy Storage System (BESS) Safety Standards and Chemistry Type	What standards are applied and what type of BESS being installed.	The Applicant confirms NFPA 855 is being considered in the design. Strict testing regimes for BESS are being applied to reduce the risk of thermal runaway including UL9540A alongside other mitigation measures as set out and secured in the Outline Battery Safety Management Plan [EN010158/APP/7.9.3] [REP1-092] Lithium Iron Phosphate (LFP) Li-ion batteries are being proposed due to their better safety credentials over the Nickel Manganese Cobalt (NMC) battery type.	Agreed
3	Emergency Response Plan	Prior to installation of the BESS, the	The Applicant confirms that an Emergency Response Plan will be prepared in consultation with the BMKFA	Agreed

Electronic Record and Signature Disclosure		

ELECTRONIC RECORD AND SIGNATURE DISCLOSURE

From time to time, EDF Energy Renewables Limited (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through the DocuSign system. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to this Electronic Record and Signature Disclosure (ERSD), please confirm your agreement by selecting the check-box next to 'I agree to use electronic records and signatures' before clicking 'CONTINUE' within the DocuSign system.

Getting paper copies

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after the signing session and, if you elect to create a DocuSign account, you may access the documents for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a \$0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

Withdrawing your consent

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. Further, you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.

How to contact EDF Energy Renewables Limited:

You may contact us to let us know of your changes as to how we may contact you electronically, to request paper copies of certain information from us, and to withdraw your prior consent to receive notices and disclosures electronically as follows:

To contact us by email send messages to: alison.mccoll@edf-re.uk

To advise EDF Energy Renewables Limited of your new email address

To let us know of a change in your email address where we should send notices and disclosures electronically to you, you must send an email message to us at alison.mccoll@edf-re.uk and in the body of such request you must state: your previous email address, your new email address. We do not require any other information from you to change your email address.

If you created a DocuSign account, you may update it with your new email address through your account preferences.

To request paper copies from EDF Energy Renewables Limited

To request delivery from us of paper copies of the notices and disclosures previously provided by us to you electronically, you must send us an email to alison.mccoll@edf-re.uk and in the body of such request you must state your email address, full name, mailing address, and telephone number. We will bill you for any fees at that time, if any.

To withdraw your consent with EDF Energy Renewables Limited

To inform us that you no longer wish to receive future notices and disclosures in electronic format you may:

- i. decline to sign a document from within your signing session, and on the subsequent page, select the check-box indicating you wish to withdraw your consent, or you may;
- ii. send us an email to alison.mccoll@edf-re.uk and in the body of such request you must state your email, full name, mailing address, and telephone number. We do not need any other information from you to withdraw consent.. The consequences of your withdrawing consent for online documents will be that transactions may take a longer time to process..

Required hardware and software

The minimum system requirements for using the DocuSign system may change over time. The current system requirements are found here: <https://support.docusign.com/guides/signer-guide-signing-system-requirements>.

Acknowledging your access and consent to receive and sign documents electronically

To confirm to us that you can access this information electronically, which will be similar to other electronic notices and disclosures that we will provide to you, please confirm that you have read this ERSD, and (i) that you are able to print on paper or electronically save this ERSD for your future reference and access; or (ii) that you are able to email this ERSD to an email address where you will be able to print on paper or save it for your future reference and access. Further, if you consent to receiving notices and disclosures exclusively in electronic format as described herein, then select the check-box next to 'I agree to use electronic records and signatures' before clicking 'CONTINUE' within the DocuSign system.

By selecting the check-box next to 'I agree to use electronic records and signatures', you confirm that:

- You can access and read this Electronic Record and Signature Disclosure; and
- You can print on paper this Electronic Record and Signature Disclosure, or save or send this Electronic Record and Disclosure to a location where you can print it, for future reference and access; and
- Until or unless you notify EDF Energy Renewables Limited as described above, you consent to receive exclusively through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you by EDF Energy Renewables Limited during the course of your relationship with EDF Energy Renewables Limited.
