

I strongly object to this unnecessary Rosefield solar project.

It will completely devastate this beautiful rural area which has already been impacted by HS2 EWR

Other solar farms and Battery storage units

This Rosefield project will cause so many problems in this area with losses of Buisness and jobs

It will completely destroy our precious wildlife and Habitats

Cause destruction of our rural narrow roads

Traffic congestion . Noise pollution light pollution

Increase fire risk especially to those living in thatched cottage's .

And a loss of a rural amenity that's enjoyed by everyone near and far
