

Dear Sur or Madam,

Following months of on-going discussions regarding Rosefield Solar Farm in our area I would like to convey my thoughts as a Government decision will soon be made.

As a community we have had to endure years of HS2/East West rail projects and they have caused nothing but angst.

Massive angst. Road closures, long and lengthy diversions, unsafe roads in our small villages.

We have witnessed first hand the devastation to local farmers. The turmoil they have endured - emotional and physical.

Their livelihoods not considered. Money obviously comes first and not human decency.

We seem to have an over-spill of solar farms around the country, this particular one will no doubt cost money to install and not give anything worthwhile back in return.

We will not benefit from HS2, EW rail is not as yet running. Will we gain from total disruption yet again to this beautiful area of Bucks - no!

The project must not go ahead. We must continue to seed the land, plough the land and enjoy the wonderful sight of countryside and thank the farmers for their never-ending task of providing food for both humans and animals.
