

My concerns relate to the fact that no consideration was given to the cumulative effects of the proposed development on the quality of life in a small rural community already suffering from the impact of HS2, East west rail, an incinerator, a prison building which will continue to on going during the installation and construction of the proposed development. Our roads and country lanes are not fit to take such volume and intensity of useage as the very present difficulties show. Are we expected to bear the additional burden of a new sub-station plus battery storage from Statera and Statcraft and numerous other applications for additional solar farms without proper consideration of the effect that all of this will transform the area into an industrial zone for miles without proper consideration. Rosefield cannot be considered in isolation.
