

In response to the Request for Further Information set out in the Rule 17 Letter dated 3 August, on behalf of NGET we comments as follows:

- NGET can confirm that the form of protective provisions to be included in the DCO has been agreed with the Applicant, and the Applicant has confirmed that the DCO will be updated at DL6 to include that agreed form.
- The Agreement currently under negotiation between NGET and the Applicant is at an advanced stage. Matters remaining to be resolved concern identification of specific points of interface, and the appropriate protection of NGET's ability to deliver future infrastructure at those points. NGET will continue to work with the Applicant to close out these remaining issues to complete the Agreement.

Please acknowledge receipt and should we be able to assist further, please let us know.
