

This project is a potential disaster waiting to happen if it goes ahead. From the point of fire risk and traffic chaos in the surrounding areas. The local roads can just about cope with the through traffic at the moment, any additional large vehicles going through Winslow and other villages will bring the lanes to a standstill. Nobody seems to be addressing these issues. Before any project of this size is considered there needs to be a bypass around Winslow and a more appropriate site that will not impact the roads and villages in this area. This needs to be stopped now!!
