

One Earth Solar Farm

Volume 6.0 Environmental Statement [EN010159]

Volume 3

Figure 4.1: One Earth Project Timeline

February 2025

Document Reference: EN010159/APP/6.20

Revision 01

Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009 - Reg 5 (2) (a)

PROJECT TIMELINE

 Public and stakeholder feedback obtained to inform the initial outline proposals which can later be refined.

> 2023 September-November

Community Update

Follow-up communication with stakeholders following initial consultation events, further explanation of the process and answering key overarching questions.

2024 January

PEIR Publication

The PEIR boundary remained approximately 1,500ha, however a more defined solar PV site area of 965ha was proposed.

2024 May

DCO Application Submission

 The Order Limits total approximately 1,433Ha. The DCO accounts for the PEIR assessment results and feedback, as well as further design and environmental refinement.

> 2025 Q1

2023 November

Initial site boundary and masterplan which included potential areas for solar and environmental mitigation and enhancement, as well as areas of search for cable routes. The Order Limits comprised approximately 1,500Ha.

EIA Scoping

2024

Launch of the One Earth Community Fund, and indications of design changes including the removal of solar panels near homes and communities, and locations of key infrastructure including substations, to be presented in the PEIR

Community Update

2024 May-July

Public and stakeholder feedback obtained to inform the updated proposals that are submitted as part of the DCO application.
