## **One Earth Solar Farm Examination Library**

**Updated – 11 December 2025**

This Examination Library relates to the One Earth Solar Farm application. The library lists each document that has been submitted to the examination by any party and documents that have been issued by the Planning Inspectorate. All documents listed have been published to the National Infrastructure's Planning website and a hyperlink is provided for each document.

A unique reference is given to each document; these references will be used within the Report on the Implications for European Sites (if issued) and will be used in the Examining Authority's Recommendation Report to the Secretary of State. The documents within the library are categorised either by document type or by the deadline to which they are submitted.

Please note the following:

- This is a working document and will be updated periodically as the examination progresses.
- Advice under Section 51 of the Planning Act 2008 that has been issued by the Inspectorate, is published to the National Infrastructure Website but is not included within the Examination Library as such advice is not an examination document.
- This document contains references to documents from the point the application was submitted to when the examination closes.
- The order of documents within each sub-section is either chronological, numerical, or alphabetical and confers no priority or higher status on those that have been listed first.
