

Large-Scale National Grid Data

Published 1994

Source map scale - 1:2,500

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Published 1886

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

10k Raster Mapping

Published 2000

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

10k Raster Mapping

Published 2000

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

Published 1885

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Nottinghamshire

Published 1884 - 1885

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

10k Raster Mapping

Published 2000

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

Large-Scale National Grid Data

Published 1994

Source map scale - 1:2,500

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Published 1886

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Large-Scale National Grid Data

Published 1994

Source map scale - 1:2,500

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Ordnance Survey Plan

Published 1974

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Additional SIMs
Published 1992
Source map scale - 1:2,500

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are further, minor editions of mapping which were produced and published in between the main editions as an area was updated. They date from 1947 to 1994, and contain detailed information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data

Published 1994

Source map scale - 1:2,500

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Map Name(s) and Date(s)

The diagram shows a 2x2 grid of plots. The top-left plot is labeled '021_01', '1885', and '1:2,500'. The top-right plot is labeled '021_02', '1885', and '1:2,500'. The bottom-left plot is labeled '021_05', '1886', and '1:2,500'. The bottom-right plot is labeled '021_06', '1885', and '1:2,500'. A central green square is located at the intersection of the four plots.

Nottinghamshire

Published 1900

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Map Name(s) and Date(s)

021_01 1900 1:2,500	021_02 1900 1:2,500

Large-Scale National Grid Data

Published 1994

Source map scale - 1:2,500

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

10k Raster Mapping

Published 2000

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

APPENDIX D OTHER SUPPORTING DESK STUDY INFORMATION

1. UXO maps
2. BGS borehole records
3. Response relating to animal burial pits
4. Water abstraction records

UNEXPLODED BOMB RISK MAP

SITE LOCATION

Map Centre: 481636,373141

This map principally indicates a hazard from Unexploded Bombs (UXB) due to WWII bombardment. Other sources of Unexploded Ordnance (UXO) may be present. It should be noted that this map does not represent UXO risk and should not be reported as such when reproduced.

LEGEND

- High:** Areas indicated as having a bombing density of 50 bombs per 1000acre or higher.
- Moderate:** Areas indicated as having a bombing density of 15 to 49 bombs per 1000acre.
- Low:** Areas indicated as having 15 bombs per 1000acre or less.

How to use your Unexploded Bomb (UXB) risk map?

This map indicates the potential for UXBs to be present because of World War Two (WWII) bombing. It can be incorporated into a technical report, such as a Phase 1 Desk Study, or similar document as an indication of the potential for UXO encounter on a Site. Other sources of UXO may also be indicated, although note that these are not comprehensive and more detailed research is required to confirm their presence.

What if my Site is in a moderate or high density area?

We typically recommend that a detailed UXO desk study and risk assessment is undertaken for sites in an area with a moderate or high bombing density. Additionally, if your site is in close proximity to a strategic target, military establishment, airfield or bombing decoy, then [additional detailed research](#) is recommended.

If my site is in a low risk area, do I need to do anything?

If both the map and other research confirm that there is a low potential for UXO to be present on your site, then, subject to your own comfort and risk tolerance, works can proceed with no special precautions.

If you are unsure whether other sources of UXO may be present, you can request one of our [pre-desk study assessments \(PDSA\)](#) by emailing a site boundary and location to uxo@zetica.com.

You should never plan site work or undertake a risk assessment using these maps alone. More detail is required, to include an assessment of the likelihood of a source of UXO hazard from other military activity not reflected on these maps.

If I have any questions, who do I contact?

tel: +44 (0) 1993 886682 email: uxo@zetica.com web: www.zeticauxo.com

The information in this UXB risk map is derived from a range of sources and should be used with the [accompanying notes on our website](#).

BGS BOREHOLE RECORDS

A list of BGS boreholes records that has been reviewed is provided below, locations of which are depicted on the plan provided in this appendix.

Full copies of borehole records are not supplied with this report as the records for most of these locations extend to 50+ pages.

The following details will allow the original records to be viewed if required:

<https://mapapps2.bgs.ac.uk/geoindex/home.html>

- Search for a location close to the site (eg Ragnall)
- Select the **Add Data** option on the left of the screen
- Select the plus sign next to the **Borehole Records** entry
- Zoom in so that borehole reference numbers are visible
- Click on the coloured borehole locations to select and view individual records

11th January 2024

Dear Frances,

**Animal Health Act 1981
Animals (Miscellaneous Provisions) Order 1927**

Thank you for your enquiry of 11/01/2024. There is no register of animal burial sites to assist with your enquiry therefore the Animal and Plant Health Agency (APHA) is not in a position to give reassurance in respect of the suitability of the land in question.

If burial sites are disturbed, there may be implications under the Control of Pollution Act and in this respect I suggest that you contact the appropriate authority.

In the event that animal remains are discovered in the course of land excavation, work should cease immediately and you should report the occurrence or your suspicions to this office. A licence will be required under the above legislation to enable excavation and subsequent disposal of the remains in line with Animal By-Products Regulations.

I have enclosed a copy of the Guidelines for Exhumation and Disposal of Animal Carcasses (AB142) for your information.

Please do not hesitate to contact me if further assistance is required.

Yours sincerely,

Rachel Sheldrick

Rachel Sheldrick
Administrative Officer

One Earth Solar Farm

NB: There are no records maintained by the local planning authorities that relate to any **unlicensed** water abstractions, with the exception of Newark and Sherwood District Council. There were no entries in that dataset located within the Order Limits, or within 1km of the Order Limits.

The data presented below were provided by the Environment Agency (25 July 2025), and this replaces the dataset taken from the Envirocheck report that was used in the previous revisions of this document.

Licenced Water Abstractions (active only)		On-site abstractions

APPENDIX E SITE RECONNAISSANCE PHOTOGRAPHS

NB: The site walkover, for which details are provided in this appendix, was undertaken on 13, 14 and 15 March 2024, and therefore the walkover limits were defined by the site boundary that was defined at that time.

It is therefore possible that the walkover refers to, or includes photographs of, features that are no longer within the Order Limits. As the change to the project boundary resulted in a reduction in boundary size, not an increase, there are no areas of the site that were not visited by the walkover.

The mapping provided in Appendix B should be consulted for the boundary that is under consideration for this application.

Basic Details

Weather Conditions	☐ Heavy Rain ☐ Rain ☐ Drizzle ☐ Overcast ☒ Cloudy ☐ Sunny Spells ☐ Sunny ☐ Fog ☐ Snow ☐ Thunder ☐ Hail
Any Other Details	
Due Diligence report?	☒ No ☐ Yes

A. Current Site Use

Question	Combined Response
A1. What are the main land uses on site?	Arable (Agricultural) :
A2. What are the current land uses NORTH of the site?	Arable (Agricultural) :
A3. What are the current land uses EAST of the site?	Arable (Agricultural) : Limited residences to thr east
A4. What are the current land uses SOUTH of the site?	Arable (Agricultural) :
A5. What are the current land uses WEST of the site?	Arable (Agricultural) :

A6. Current Site Activities	Farm contractors at work.
A7. Current Site Activities - Adjacent Sites	None
A8. Site Boundaries	Hedgerows withh wooden fences in places.

B. Access Constraints

B1. General Access Constraints?

(X) No

() Yes

Question	Combined Response
B4. Are there any access constraints for the SI phase?	Gates / Fences;Overhead Power Lines;Protected Trees / Hedges;Soft Ground : Building constraints

C. Physical Characteristics

Question	Combined Response
C1. Is the Site level?	Yes : Some rolling fluctuation in topograohy
C2. Is there any evidence of subsidence, landslip or slope erosion?	No :
C3. Are there any changes in level between the site and adjacent sites?	No :

Enter percentage of site coverage by buildings / roads / hardstanding etc. (Soft cover is automatically calculated)

C4. Percentage Hard Cover0

C5. Percentage Soft Cover100

C6. Cover Details

D2. Evidence of Vegetation Stress	no
-----------------------------------	----

D5. Site visit in dormancy period? (X) Yes
 () No

[illegible]

Include visual observations and any anecdotal information from site representatives. Obtain or consult copies of drainage plans where possible.

Drainage system noted at the far hill farm.

Ditches bound the fields with field drains running into them

D12 Site Waterlogging or

E. Structures and Services

Question	Combined Response
E1. Are there any buildings on site?	Yes : Telecom mast

Question	Combined Response
E2. Any evidence of gas protection measures in buildings?	No :

Question	Combined Response
E3. Are there any buried services present?	Yes : Water pipes around field boundaries to feed water troughs. Electrical cables possible around the telecom mast.
E4. Are there any overhead services present on or adjacent to site?	Yes : Small power lines and telephone pylons

Question	Combined Response
E5. Are there any underground structures present on or adjacent to site?	No :

E6. Phone Signal	Reasonable Signal, Over Most of the Site
E7. Cellular Providers Tested	Vodafone, o2
E8. Data Connectivity	Good 4G or 5G

F. Geotechnical Considerations

<i>Question</i>	<i>Combined Response</i>
F2. Is there any evidence of damage to existing building structures on site?	No :
F3. Are there any remains of building structures present on or adjacent to site?	No :
F4. Are there any retaining walls present on or adjacent to site?	No :
F5. Are there any abrupt changes in ground level present on or adjacent to site?	No :
F6. Are there any potentially unstable slopes/ exposed ground present on or adjacent to site?	No :
F7. Are there any mature trees on site?	Yes : Predominantly around boundaries on the hedgerows
F8. Is there any visual evidence of infilled basements on site?	No :

G. Potential Evidence for Contamination

<i>Question</i>	<i>Combined Response</i>
G1. Is there any potentially hazardous materials storage and use on site?	Yes : Likely farming substances in sheds and barns. Eg fertiliser
G2. Is there any waste storage on site?	No :
G3. Is there any fly tipping / litter on site?	Yes : Waste brick used to construct farm hard standing. Few piles of building rubble at far hill farm
G4. Are there any electricity sub stations/ transformers on or near site?	No :

<i>Question</i>	<i>Combined Response</i>
G5. Is there any evidence for ACM on site?	None Observed :

<i>Question</i>	<i>Combined Response</i>
G6. Is there any visual evidence of potential contamination on site?	Other : Murky watercourses and foaming in blockage of major stream
G7. Is there any visual evidence of potential contamination on adjacent sites?	None Observed :

Basic Details

Site Walkover Questionnaire.

Date	13/03/2024
Project Name	One earth solar farm
Project No.	323323
Site Name	Route 2: Start point C
GPS Location	53° 13' 48.545" N 0° 48' 27.739" W
Site Engineer	Euan gray-stephens
Accompanied by	
Site Engineer Arrival Time	13/03/2024, 12:48
Site Engineer Departure Time	
Other RSK Staff On Site	
Weather Conditions	☐ Heavy Rain ☐ Rain ☐ Drizzle ☐ Overcast ☒ Cloudy ☐ Sunny Spells ☐ Sunny ☐ Fog ☐ Snow ☐ Thunder ☐ Hail
Any Other Details	
Due Diligence report?	☒ No ☐ Yes

A. Current Site Use

Question	Combined Response
A1. What are the main land uses on site?	Arable (Agricultural) : Arable, plow3d,
A2. What are the current land uses NORTH of the site?	Arable (Agricultural) :
A3. What are the current land uses EAST of the site?	Arable (Agricultural) :
A4. What are the current land uses SOUTH of the site?	Arable (Agricultural) :
A5. What are the current land uses WEST of the site?	Arable (Agricultural) :

A6. Current Site Activities	Farming, arable
A7. Current Site Activities - Adjacent Sites	Farming, arable, large scale substation.
A8. Site Boundaries	Hedges, small fences. Bridleway on northern boundary of fields 86, 83,85. Roads on some areas. streams and drainage around some field boundaries

B. Access Constraints

B1. General Access Constraints?

(X) No

() Yes

Question	Combined Response
B4. Are there any access constraints for the SI phase?	Gates / Fences;Overhead Power Lines;Protected Trees / Hedges;Soft Ground;Surface Water :

C. Physical Characteristics

Question	Combined Response
C1. Is the Site level?	Yes : Broadly level, undulating topography which rolls in some places. High points on large power pylons.
C2. Is there any evidence of subsidence, landslip or slope erosion?	Yes : Small flooded hollow with temp fencing in area of surface flooding in field 86, could be broken drain, perhaps local subsidence
C3. Are there any changes in level between the site and adjacent sites?	No :

Enter percentage of site coverage by buildings / roads / hardstanding etc. (Soft cover is automatically calculated)

C4. Percentage Hard Cover0

C5. Percentage Soft Cover100

C6. Cover Details

D. Environmental Characteristics

Question	Combined Response
D1. Is there any vegetation on site?	Grasses;Hedges;Shrubs;Trees : arable crops, trees round field boundaries

D2. Evidence of Vegetation Stress	No.
-----------------------------------	-----

Question	Combined Response
D3. Is there any evidence of invasive species being present on site?	No Invasive Species Observed :
D4. Is there any evidence of invasive species being present on adjacent sites (within 10m of site boundary?)	No Invasive Species Observed :

D5. Site visit in dormancy period? ☒ (X) Yes ☐ () No

Question	Combined Response
D6. Are there any surface water features on site?	Yes : Field drains and ditches around field boundaries
D7. Are there any surface water features within 250m off site?	Yes : Streams and drainage around fields

Question	Combined Response
D8. Visual evidence of contamination of surface waters	Cloudy Water;Discoloured Sediment;Discoloured Water;Leachate Ingress : Green, orange colour and build up in ditches and drains. Foam and discoloured in ditches between field 96 and 98. Elsewhere, drainage water is mucky and murky

Drainage could be to ground, surface water sewer, foul sewer, watercourse, SuDS etc.

Include visual observations and any anecdotal information from site representatives. Obtain or consult copies of drainage plans where possible.

D9. Where does the site drain to? Various

D10. Site Drainage Information Various

D11. Site Outfall Information

D12. Site Waterlogging or Flooding	Areas of surface lying water around edges of fields
------------------------------------	---

E. Structures and Services

Question	Combined Response
E1. Are there any buildings on site?	No :

Question	Combined Response
E2. Any evidence of gas protection measures in buildings?	No :

Question	Combined Response
E3. Are there any buried services present?	No :
E4. Are there any overhead services present on or adjacent to site?	Yes : Power lines and telegraph poles. Large and medium pylons in South sector

Question	Combined Response
E5. Are there any underground structures present on or adjacent to site?	No :

E6. Phone Signal	Reasonable Signal, Over Most of the Site
E7. Cellular Providers Tested	Vodafone, o2
E8. Data Connectivity	Good 4G or 5G

F. Geotechnical Considerations

<i>Question</i>	<i>Combined Response</i>
F2. Is there any evidence of damage to existing building structures on site?	No :
F3. Are there any remains of building structures present on or adjacent to site?	No :
F4. Are there any retaining walls present on or adjacent to site?	No :
F5. Are there any abrupt changes in ground level present on or adjacent to site?	No :
F6. Are there any potentially unstable slopes/ exposed ground present on or adjacent to site?	No :
F7. Are there any mature trees on site?	Yes : On boundaries
F8. Is there any visual evidence of infilled basements on site?	No :

G. Potential Evidence for Contamination

<i>Question</i>	<i>Combined Response</i>
G1. Is there any potentially hazardous materials storage and use on site?	Yes : Potentially within farm buildings, eg fertiliser.
G2. Is there any waste storage on site?	No :
G3. Is there any fly tipping / litter on site?	No :
G4. Are there any electricity sub stations/ transformers on or near site?	Yes : Major substation to the east of this walkover route

<i>Question</i>	<i>Combined Response</i>
G5. Is there any evidence for ACM on site?	None Observed :

<i>Question</i>	<i>Combined Response</i>
G6. Is there any visual evidence of potential contamination on site?	None Observed :
G7. Is there any visual evidence of potential contamination on adjacent sites?	None Observed :

Weather Conditions	☐ Heavy Rain ☐ Rain ☐ Drizzle ☐ Overcast ☒ Cloudy ☐ Sunny Spells ☐ Sunny ☐ Fog ☐ Snow ☐ Thunder ☐ Hail
Any Other Details	
Due Diligence report?	☒ No ☐ Yes

A. Current Site Use

Question	Combined Response
A1. What are the main land uses on site?	Arable (Agricultural) ;Industrial : Arable farmland and electrical substation site
A2. What are the current land uses NORTH of the site?	Arable (Agricultural) :
A3. What are the current land uses EAST of the site?	Arable (Agricultural) :
A4. What are the current land uses SOUTH of the site?	Arable (Agricultural) ;Commercial;Houses with gardens : Houses, caravan site, pub and holiday homes immediately south of the start point.
A5. What are the current land uses WEST of the site?	Arable (Agricultural) :

A6. Current Site Activities Farming, electric substation

A7. Current Site Activities -
Adjacent Sites Farming

A8. Site Boundaries Hedges, streams and roads

B. Access Constraints

B1. General Access Constraints?	(X) No () Yes
---------------------------------	-------------------

Question	Combined Response
B4. Are there any access constraints for the SI phase?	Gates / Fences;Overhead Power Lines;Protected Trees / Hedges;Soft Ground;Surface Water;Unsafe Ground :

C. Physical Characteristics

Question	Combined Response
C1. Is the Site level?	Yes : Broadly level topo, some undulating surface variation, rolling changes
C2. Is there any evidence of subsidence, landslip or slope erosion?	No :
C3. Are there any changes in level between the site and adjacent sites?	No :

Enter percentage of site coverage by buildings / roads / hardstanding etc. (Soft cover is automatically calculated)

C4. Percentage Hard Cover0

C5. Percentage Soft Cover100

C6. Cover Details

D. Environmental Characteristics

Question	Combined Response
D1. Is there any vegetation on site?	Grasses;Hedges;Shrubs;Trees : And arable farming

D2. Evidence of Vegetation Stress	No
-----------------------------------	----

Question	Combined Response
D3. Is there any evidence of invasive species being present on site?	No Invasive Species Observed :
D4. Is there any evidence of invasive species being present on adjacent sites (within 10m of site boundary?)	No Invasive Species Observed :

D5. Site visit in dormancy period? ☐ Yes ☒ No

Question	Combined Response
D6. Are there any surface water features on site?	Yes :
D7. Are there any surface water features within 250m off site?	Yes : River trent immediately east

Question	Combined Response
D8. Visual evidence of contamination of surface waters	No Evidence of Contamination :

Drainage could be to ground, surface water sewer, foul sewer, watercourse, SuDS etc.

Include visual observations and any anecdotal information from site representatives. Obtain or consult copies of drainage plans where possible.

D9. Where does the site drain to? Various

D10. Site Drainage Information

D11. Site Outfall Information

D12. Site Waterlogging or Flooding	On some areas of surface, mostly field edges and tracks. Likely floodplain area beside trent. Evidence of previous flooding, I.e Green algae
------------------------------------	---

E. Structures and Services

Question	Combined Response
E1. Are there any buildings on site?	No :

Question	Combined Response
E2. Any evidence of gas protection measures in buildings?	No :

Question	Combined Response
E3. Are there any buried services present?	No :
E4. Are there any overhead services present on or adjacent to site?	Yes : Overhead power lines, medium and large pylons

Question	Combined Response
E5. Are there any underground structures present on or adjacent to site?	Yes : Likely around the substation site. Manham drain outflow point, looks like it feeds into a subsurface structure

E6. Phone Signal	Strong Signal, Over Entire Site
E7. Cellular Providers Tested	Vodafone, o2
E8. Data Connectivity	Good 4G or 5G

F. Geotechnical Considerations

<i>Question</i>	<i>Combined Response</i>
F2. Is there any evidence of damage to existing building structures on site?	No :
F3. Are there any remains of building structures present on or adjacent to site?	No :
F4. Are there any retaining walls present on or adjacent to site?	No :
F5. Are there any abrupt changes in ground level present on or adjacent to site?	No :
F6. Are there any potentially unstable slopes/ exposed ground present on or adjacent to site?	No :
F7. Are there any mature trees on site?	Yes : Mostly around boundaries,
F8. Is there any visual evidence of infilled basements on site?	No :

G. Potential Evidence for Contamination

<i>Question</i>	<i>Combined Response</i>
G1. Is there any potentially hazardous materials storage and use on site?	Yes : Epevtric substation and family buildings, rg fertiliser
G2. Is there any waste storage on site?	No :
G3. Is there any fly tipping / litter on site?	No :
G4. Are there any electricity sub stations/ transformers on or near site?	Yes : Yes in centre of this walkover sector

<i>Question</i>	<i>Combined Response</i>
G5. Is there any evidence for ACM on site?	None Observed :

<i>Question</i>	<i>Combined Response</i>
G6. Is there any visual evidence of potential contamination on site?	None Observed :
G7. Is there any visual evidence of potential contamination on adjacent sites?	None Observed : Possible on the waste ground arezzo which could not be accessed

A5. What are the current land uses WEST of the site?	Arable (Agricultural) ;Pasture (Agricultural) :

A6. Current Site Activities	Only agricultural
A7. Current Site Activities - Adjacent Sites	Agricultural
A8. Site Boundaries	Site boundaries are typically Hedges, with drainage ditches and some woodland. Tracks and roads also bound some of the fields

B. Access Constraints

B1. General Access Constraints?

(X) No

() Yes

Question	Combined Response
B4. Are there any access constraints for the SI phase?	Gates / Fences;Overhead Power Lines;Protected Trees / Hedges;Soft Ground;Surface Water :

C. Physical Characteristics

Question	Combined Response
C1. Is the Site level?	Yes :
C2. Is there any evidence of subsidence, landslip or slope erosion?	No :
C3. Are there any changes in level between the site and adjacent sites?	No :

Enter percentage of site coverage by buildings / roads / hardstanding etc. (Soft cover is automatically calculated)

C4. Percentage Hard Cover 0

C5. Percentage Soft Cover 100

C6. Cover Details

D. Environmental Characteristics

Question	Combined Response
D1. Is there any vegetation on site?	Grasses;Hedges;Shrubs;Trees : Agricultural crop

D2. Evidence of Vegetation Stress
No,but spoiled crop at fields 39 and 40. Residual corn crop strip at field 5.

Question	Combined Response
D3. Is there any evidence of invasive species being present on site?	No Invasive Species Observed :
D4. Is there any evidence of invasive species being present on adjacent sites (within 10m of site boundary?)	No Invasive Species Observed :

D5. Site visit in dormancy period?
(X) Yes
() No

Question	Combined Response
D6. Are there any surface water features on site?	Yes : Yes drainage ditches between fields.
D7. Are there any surface water features within 250m off site?	Yes : Further drainage ditches, streams and small watercourses

Question	Combined Response
D8. Visual evidence of contamination of surface waters	No Evidence of Contamination :

Drainage could be to ground, surface water sewer, foul sewer, watercourse, SuDS etc.
Include visual observations and any anecdotal information from site representatives. Obtain or consult copies of drainage plans where possible.

D9. Where does the site drain to?
Various

D10. Site Drainage Information

D11. Site Outfall Information

D12. Site Waterlogging or Flooding

E. Structures and Services

Question	Combined Response
E1. Are there any buildings on site?	No :

Question	Combined Response
E2. Any evidence of gas protection measures in buildings?	No :

Question	Combined Response
E3. Are there any buried services present?	No :
E4. Are there any overhead services present on or adjacent to site?	Yes : Yes power lines

Question	Combined Response
E5. Are there any underground structures present on or adjacent to site?	No :

E6. Phone Signal	Reasonable Signal, Over Most of the Site
E7. Cellular Providers Tested	Vodafone, o2
E8. Data Connectivity	Good 4G or 5G

F. Geotechnical Considerations

<i>Question</i>	<i>Combined Response</i>
F2. Is there any evidence of damage to existing building structures on site?	No :
F3. Are there any remains of building structures present on or adjacent to site?	No :
F4. Are there any retaining walls present on or adjacent to site?	No :
F5. Are there any abrupt changes in ground level present on or adjacent to site?	No :
F6. Are there any potentially unstable slopes/ exposed ground present on or adjacent to site?	No :
F7. Are there any mature trees on site?	Yes : Mostly around field boundaries
F8. Is there any visual evidence of infilled basements on site?	No :

G. Potential Evidence for Contamination

<i>Question</i>	<i>Combined Response</i>
G1. Is there any potentially hazardous materials storage and use on site?	Yes : Likely within farm buildings eg fertiliser
G2. Is there any waste storage on site?	No :
G3. Is there any fly tipping / litter on site?	Yes : Two pilss Metal plastic glass waste dumped beside field 5.
G4. Are there any electricity sub stations/ transformers on or near site?	No :

<i>Question</i>	<i>Combined Response</i>
G5. Is there any evidence for ACM on site?	None Observed : Waste tips did not look like they contained sheeting etc. Was solid metal.

<i>Question</i>	<i>Combined Response</i>
G6. Is there any visual evidence of potential contamination on site?	None Observed :
G7. Is there any visual evidence of potential contamination on adjacent sites?	None Observed :

A4. What are the current land uses SOUTH of the site?	Arable (Agricultural) :
A5. What are the current land uses WEST of the site?	Arable (Agricultural) :

A6. Current Site Activities	Agricultural, mostly arable including corn and possible wheat or cereals, with some pasture grassland. Small horse paddocks too.
A7. Current Site Activities - Adjacent Sites	Several poultry Houses, arable farming. Reservoir and water treatment works by field 36. Unknown fenced off area with warning signs.
A8. Site Boundaries	Hedges, farm tracks, some woodland, drainage ditches.

B. Access Constraints

B1. General Access Constraints?

(X) No

() Yes

Question	Combined Response
B4. Are there any access constraints for the SI phase?	Gates / Fences;Overhead Power Lines;Protected Trees / Hedges;Soft Ground :

C. Physical Characteristics

Question	Combined Response
C1. Is the Site level?	Yes : East of the trent is very level and flat
C2. Is there any evidence of subsidence, landslip or slope erosion?	No :
C3. Are there any changes in level between the site and adjacent sites?	No :

Enter percentage of site coverage by buildings / roads / hardstanding etc. (Soft cover is automatically calculated)

C4. Percentage Hard Cover0

C5. Percentage Soft Cover100

C6. Cover Details

D. Environmental Characteristics

Question	Combined Response
D1. Is there any vegetation on site?	Grasses;Hedges;Shrubs;Trees : Arable crops

D2. Evidence of Vegetation Stress	No
-----------------------------------	----

Question	Combined Response
D3. Is there any evidence of invasive species being present on site?	No Invasive Species Observed :
D4. Is there any evidence of invasive species being present on adjacent sites (within 10m of site boundary?)	No Invasive Species Observed :

D5. Site visit in dormancy period? (X) Yes
() No

Question	Combined Response
D6. Are there any surface water features on site?	Yes : Streams ditches, Less common than first day routes.
D7. Are there any surface water features within 250m off site?	Yes : Resvoir by filed 46. River trent lies to the west.

Question	Combined Response
D8. Visual evidence of contamination of surface waters	Cloudy Water;Discoloured Sediment;Discoloured Water;Leachate Ingress : Rust orange colour and precipitate in ditches and stream in the north east sector. Fileds are stained this colour too, possible runoff from spraying. Pond filled with green algae in North sector.

Drainage could be to ground, surface water sewer, foul sewer, watercourse, SuDS etc.

Include visual observations and any anecdotal information from site representatives. Obtain or consult copies of drainage plans where possible.

D9. Where does the site drain to? Various

D10. Site Drainage Information

D11. Site Outfall Information

D12. Site Waterlogging or Flooding	Less common than West of the trent. One or two wet fields, and a few wet spots. Noted on photos and on plans
------------------------------------	--

E. Structures and Services

Question	Combined Response
E1. Are there any buildings on site?	No :

Question	Combined Response
E2. Any evidence of gas protection measures in buildings?	No :

Question	Combined Response
E3. Are there any buried services present?	Yes : Oil pipeline markers tracked. Marked on plan and photos taken of accessible ones. Electrical cable likely in field 70 or 71. Can see it off the pylon.
E4. Are there any overhead services present on or adjacent to site?	Yes : Small power lines and telegraph poles

Question	Combined Response
E5. Are there any underground structures present on or adjacent to site?	No :

E6. Phone Signal	Reasonable Signal, Over Most of the Site
E7. Cellular Providers Tested	Vodafone, o2
E8. Data Connectivity	Good 4G or 5G

F. Geotechnical Considerations

<i>Question</i>	<i>Combined Response</i>
F2. Is there any evidence of damage to existing building structures on site?	No :
F3. Are there any remains of building structures present on or adjacent to site?	No :
F4. Are there any retaining walls present on or adjacent to site?	No :
F5. Are there any abrupt changes in ground level present on or adjacent to site?	No :
F6. Are there any potentially unstable slopes/ exposed ground present on or adjacent to site?	No :
F7. Are there any mature trees on site?	Yes : Around boundaries
F8. Is there any visual evidence of infilled basements on site?	No :

G. Potential Evidence for Contamination

<i>Question</i>	<i>Combined Response</i>
G1. Is there any potentially hazardous materials storage and use on site?	Yes : Agricultural materials, like fertiliser
G2. Is there any waste storage on site?	No :
G3. Is there any fly tipping / litter on site?	Yes : Building rubble dumped on access into unnamed Reservoir field. Did not appear to contain acme but may be buried in the rubble. Bonfire area found gut looked asorgani like tree trimings
G4. Are there any electricity sub stations/ transformers on or near site?	No :

<i>Question</i>	<i>Combined Response</i>
G5. Is there any evidence for ACM on site?	Fly Tipped : Possible acm sheeting on edge of unnamed field.

<i>Question</i>	<i>Combined Response</i>
G6. Is there any visual evidence of potential contamination on site?	None Observed :
G7. Is there any visual evidence of potential contamination on adjacent sites?	None Observed :

82 records

Select Feature	Description	Direction Taken	
1a. Main land use(s)	Field 55 planted crop with poultry houses in distance	E	
7d. Fly-tipping	Tipping adjacent to field 55, in woods by trees	NW	
7d. Fly-tipping	Building rubble tipped by field 55 and unnumbered fields by the resolver	W	

7d. Fly-tipping	Building rubble tipped by field 55 and unnumbered fields by the resolver	E	
7d. Fly-tipping	Building rubble tipped by field 55 and unnumbered fields by the resolver	W	
1d. Site boundaries.	Access to the reservoir fields. We and churned	W	

OTHER	Reservoir field and wind turbine	W	
7c. Asbestos-containing materials (ACM)	Possible acm sheeting on edge of unnamed reservoir field	E	
3a. Site Topography	Dipping West in unnamed field by reservoir	NW	

3d. Surface Cover	Sandy composition of field by reservoir	N	
1a. Main land use(s)	Boundary of field 36 and 55	NE	
1a. Main land use(s)	Field 36 shaved	N	

1a. Main land use(s)	Field 36	W	
1c. Adjacent land use(s)	Water treatment works north of field 36	NE	
7d. Fly-tipping	Building rubble ble and road surface beside field 3	SE	

1a. Main land use(s)	Field 3 and 6 horse paddocks	N	
1a. Main land use(s)	Arable east of field 9	SE	
1d. Site boundaries.	Tree shrub boundaries between field 9 and Eastward field	S	

1a. Main land use(s)	Shaved field east of field 9 small parcel.	SW	
1a. Main land use(s)	Green crop field east of field 9	NE	
1a. Main land use(s)	Field 10 and standing water	SE	

4d. Surface waters on site	Standing water field 10	S	
1a. Main land use(s)	Near field 4 crop harvested	NE	
1a. Main land use(s)	Field 11 crop harvested corn likely	SE	

5c. Buried and overhead services	Oil pipeline marker	N	
1a. Main land use(s)	Field 4 harvested corn	N	
4d. Surface waters on site	Ditches on north boundary of field 4	E	

5c. Buried and overhead services	Oil pipeline warning into field 4 area	W	
4i. Waterlogging or flooding	Field 4 surface flooding	NE	
4i. Waterlogging or flooding	Surface flooding field 11	S	

4d. Surface waters on site	Straam discoloured orange with orange precipice in bed	SE	
1a. Main land use(s)	Turf cover and turf laying (saw van with soil trufing parked up) in field 16. Presitine grass	E	
1a. Main land use(s)	Pasture grass beside field 11	S	

1a. Main land use(s)	Crop field 28	SW	
4d. Surface waters on site	Orange stream and culvert on turfed grass aarea in east	E	
1a. Main land use(s)	Turf grass area to the east (no access)	E	

4f. Visual evidence of contamination of surface waters	Rust orange stream	SE	
OTHER	Possible sprayed dead crops field 37	SW	
1a. Main land use(s)	Filed 48 orange crop	S	

4f. Visual evidence of contamination of surface waters	Ditches between 48 and 37. Foam and precipitate	NW	
4a. Vegetation on site	Crop on field 48	SW	
4d. Surface waters on site	Drainage between 48 and 59	N	

1a. Main land use(s)	Corn crop fields 59	SW	
1a. Main land use(s)	Green crop on field 60 and surface lying water	W	
4i. Waterlogging or flooding	Surface flooding on edge of field 59, discoloration	S	

4f. Visual evidence of contamination of surface waters	Discoloration of surface water in field 59	SE	
1a. Main land use(s)	Filed 51 bare crop	N	
1a. Main land use(s)	Field 59 harvested corn crop	S	

1a. Main land use(s)	Pasture field 56 no access	W	
1a. Main land use(s)	Field 44 pasture	W	
3a. Site Topography	Gentle low point field 51	N	

4g. Site drainage	Ditches dredging filed 44	S	
OTHER	Field 56 and 43 green crop	SW	
4i. Waterlogging or flooding	Surface flooding field 44	SW	

4i. Waterlogging or flooding	Filed 28 West Side soggy and surface water	N	
4f. Visual evidence of contamination of surface waters	Leachate in ditches field boundaries 28 and 51	S	
7d. Fly-tipping	Bonfire, mostly organics, on field 30	W
