

# GREAT NORTH ROAD SOLAR AND BIODIVERSITY PARK

Viewpoint 18  
Besthorpe Nature Reserve

### Cardinal views analysis:

### Key

- No solar areas visible from this viewpoint in this direction
  - Wireline indicates theoretical visibility but would not be discernible in practice
  - Visibility of solar areas in this direction during summer and winter
  - Visibility of solar areas in this direction during winter only
- S An intermediate substation is visible in this direction of the view, refer to text
- M The main 400kV substation is visible in this direction of the view
- Be The BESS is visible in this direction of the view

90deg baseline panorama and wireline

Scale: 1:30,000	Drawing Size: A3	Revision: 00	

Coordinate System: OSGB36 / British National Grid

**Existing View**  
This view is located at the edge of the nature reserve and looks west across flat fields bounded by hedges and trees towards a skyline formed by rising ground beyond the River Trent. Between the trees there are glimpsed views of buildings, turbines and pylons and the church spire at Carlton-on-Trent forms a notable landmark to the northwest.

**Predicted Changes to Views**  
During construction and all stages of operation, solar arrays would be visible in the small area of open fields on rising ground seen above a cluster of houses to the west. The rest of the Development would be screened by vegetation. After decommissioning, taller hedgerows would remain, but would not be noticeable in this view.
