

**Existing View**

This viewpoint is located on a footpath across an arable field. The view to the northwest looks towards hedges alongside the nearby road, beyond which there are glimpsed views to fields and woodlands. In other directions Knapthorpe Manor and nearby farms and large poultry sheds can be seen as well as the nearby stack and plant at Bedmax. Pylons and wind turbines are seen looking towards nearby rising ground to the northeast and Muskham Wood Solar Farm will be visible across these rising fields once constructed.

**Predicted Changes to Views**

During construction works traffic would route along the road adjacent to the viewpoint and users may notice a slight increase in vehicles as nearby elements of the Development are installed. During construction and early operation the solar arrays would be seen over the roadside hedges and the nearby hedge to the south. Once these hedgerows have grown taller, the Development would be entirely or largely screened from view. Once decommissioned, taller hedgerows would remain.
