

I did not know my objection and interest had not been registered for the deadline of 2nd October. I assume that something must have gone wrong in the process, I suspect my efforts may have "timed out" when filling in and submitting my registration.

I have a definite interest as a resident in Carlton on Trent village with objections about the scale, the negative visual impact, the increased flood risk to the residents of Carlton on Trent, a village already impacted by surface runoff flooding and the huge reduction in agricultural produce and jobs in the area.

Can this be registered and can I be issued with a registration number for the rest of the process.

Many thanks.
