

FFF request that the ExA visit the proposed site, and visit all high points in the area including but not limited to Retford Road (Leverton Hill), North Leverton Windmill, and Sturton High House, Drive all public roads within the 'red-line' of proposed development, but also walk the footpaths/bridleways through the proposed site including but not limited to Blue Stocking Lane North Wheatley, and visit North Leverton Windmill (accompanied access required) to see impact on views . This way you will see just how small and narrow the roads are, where there are no footpaths and how all footpaths will be affected (refer to site map). Representative(s) for FFF would be more than happy to attend any accompanied site inspections and look forward to seeing the planned routes in advance of the actual visits.
