Dear Spencer

I have to type it again I didn't save the right document.

I am a [REDACTED] year old woman who lives under the [REDACTED]. My journey with the project began in March 2023 when a man was photographing me in my own home. The stress of the projects has taken its toll on my mental and physical health. In 2024 I was diagnosed with [REDACTED] and in January 2025 was diagnosed with [REDACTED]. Although they can not be blamed for the illnesses they can no be discarded.

The quarry was passed in 2005 and went back to planning in 2020 to renew the planning. The project has already broken the planning by running wagons out of the permitted hours 7 to 7 Monday to Friday and 7 to 2 on Saturday. These projects are self-governing. I had to prove they were breaking the planning they just said 'we are not'. I had to get evidence which I did with my security cameras. The permitted amount of wagons is 96 vehicles in and 96 out a day this does not include vehicle which can use the quarry 24/7 7 days a week.

The land was sold in 2021 to a [REDACTED] who is best mates with [REDACTED]. He is already putting in for houses on farms which he has now made redundant. Plus planning at Fenton for an office block.

2022 the step fusion was granted the right to use WB station to build their project. This will need to go to planning.

2023 the power station was decommissioned and cold which was over bought was being shipped back to South Africa at a good price. Then removal of ash 30 wagons a day. The demolition of the station began which we as resident in the village were unaware of. My house when I had a meeting with Mason Brown they said they didn't know my house was there and I would have to move out when the towers were demolished. The project has no impact on my so I'm told.

WB started being built in 1954 and commissioned in 1966. The dust which cover the village after an explosion is unbelievable. I have asked Bassetlaw environmental health to check for asbestos but they say there are no mitigating circumstances for them to test. We eat in for days after. My Grandchildren will never go in my bungalow again I feel it is not in their health interest.

Next in 2023 came the gas station who went to planning for battery packs. It was finally passed in November of that year by Bassetlaw planning committee. They had been wined and dined by the project. A Harworth miner who was on the committee 'said Bassetlaw are going to show them how to do it and do it bloody right.' Where is the planning committee now. Through out this planning process I tried to contact Bassetlaw planning and they didn't respond. I was allowed at the meeting where it was passed for 3 mins. Not long when the project took the planning committee out in land rovers. The project has been sold to Total.

At the same time as the gas station notices started to do up about west burton solar. The project is Island Green power who also had applications in for Cottam and Gate.

WB solar want to bring in the gable from the panels in Lincoln.

Gate Burton and Cottam were passed on 9th July 9 days after labour came into power by [REDACTED]

WB solar whose consultant was [REDACTED] secretary of state was not passed until November later in the year because it clashed with the Fusion on land they both wanted to use. WB solar is now doing corrections and Gate burton has been sold to EDF 2 projects colliding. How can the combined impact not be taken into account when they are colliding with each other.

WE are now in the process of fighting yet another project RES which already is 9,000 pages long. If all the other projects have the same amount the over seeing authority will have to read over 50,000 to find out if they are sticking to what is in there planning. Bassetlaw Have not even been to the RES meeting or submitted any proposal and yet they will over see the projects.

Believe it or not when the power station was decommissioned it had no electricity. The grid employed Vue to cable to the sub station on Station road to get power at the same time as laying fibreoptic cable for [REDACTED] and virgin media. As a village we were not told of the work and living next to it was told. Oops forgot to tell you we might block you in'

Then we had Morrisons with there wagons and tractor doing work on the pylons removing hedge rows and frightening the wild life.

Back to this project we now had RES to be followed by National Grid High Marnham to Hull, which will go across country and demolish more anticultural fields.

Our MP is more interested in being in London stopping people getting on the tube without paying and going to car boot sale to catch people selling stolen goods. [REDACTED] does nothing for his constuents next to WB.

If you look at what has been passed and what is coming up for planning does it not beg a question are we being sold out by the government. Cottam is being ear marked to be a nuclear station.

There is no where which has as many projects. All being done for greed.

I ask that you look at the land from Gainsborough road because everything you see will be a project.

Who do we go to for help? I don't know for 2 years I have emailed 39 people and as yet have not found anyone who cares. I correct that there are people who care just not got any power to do anything about it.

We came out od Europe because we wanted to be self sufficient ask yourself how many of the project are British lead and funded. None which I have found.

The villages around the Grid have been failed by the government with little or no thought for their physical or mental well being.

The land is saturate, ask the quarry they had had a right job building they building because its so wet.

We will have less green spaces than London. Our wild life is confused and doesn't know where to go.

Please think carefully before you make a decision you are destroying or farming way of life.

Hi Christine,

I am unable to open that email attachment, please could you resend?

Many thanks

Spencer

Spencer

Can you submit this for me or at least read it and give it the the planning inspectorate.

Christine

Hi Christine,

Thank you for this email, I can confirm that we have received this one as well as the 1st planned walk that you sent to us yesterday.

Kind regards

Spencer Barrowman | Case Manager - National Infrastructure (Environment)

Subject: Walk number 2

You don't often get email from [REDACTED]@quantumbusinesspark.com. [Learn why this is important](#)

Hi Spencer

Walk number 2 park in the reindeer car park. The pond in front of it was put in by [REDACTED] the previous land owner. It has a sluice system. It has over a meter of silt in it which comes from the fields. The main road flood when it rains.

Walk straight forward to springs lane. You cross the road. Continue on this road and it will become a track more than a road. Stay on this until you reach the train bridge. Turn right here.

Continue on this until you get to a wooden gate and a wooden bridge. It is on a bend. You will see high house Farm. Cross the bridge and through the gate and cross the field. You will come to a hole in the wall.

Turn left here and continue to the road. You will see high House from the other side.

Continue on the road and turn left down a track and you will get to the train tracks. Cross these.

Continue up this track and you will come to the wood yard on you left. Just after the woodyard it a gate. Go through it. Walk straight forward. The view gets better as you walk. If you have maps you will be able to see where solar is going.

It continues down hill to a gate continue straight forward and you will come to the windmill. Continue passed the windmill to main road and turn left so you go through the village. You will pass Watkinsons Yard. A gate which has no houses. RES removed this from their plans for now. Passed the shop and turn left back onto leverton road. Passed the doctors surgery. You will pass on your right. You will have to cross the road pass a farm yard. As you walk away from it. This is where the RES cable are going into the fields.

Continue walking but look Left and you will see where the solar panels are going. Deer are being killed on this road because they don't know where they belong because of projects. Continue into Sturton but also look right where there are no house and see what is going to be destroyed by combined impact of projects.

You will end up back at the reindeer.

Happy walking

Kind Regards

Christine Warren
