STEEPLE RENEWABLES PROJECT

SECTIONS 91 AND 92 OF THE PLANNING ACT 2008

RULE 13 (6) OF THE INFRASTRUCTURE PLANNING (EXAMINATION PROCEDURE) RULES 2010

NOTICE OF HEARINGS RELATING TO THE PROPOSED STEEPLE RENEWABLES PROJECT DEVELOPMENT CONSENT ORDER

NOTICE IS HEREBY GIVEN that, at the date, time and place set out below, a Compulsory Acquisition Hearing and Issue Specific Hearings 2 and 3 (together the Hearings) will be held by the Examining Authority (appointed by the Secretary of State) for the examination of the application made by Steeple Solar Farm Limited (registered company number: 13889253) of Beaufort Court, Egg Farm Lane, Station Road, Kings Langley, Hertfordshire, WD4 8LR ("the Applicant") for a Development Consent Order (DCO) under sections 14, 15 and 37 of the Planning Act 2008 ("the Application").

The Application was submitted by the Applicant to the Secretary of State via the Planning Inspectorate of Wednesday 14 May 2025 and was accepted for examination on 11 June 2025. The Application has been given the Planning Inspectorate reference number EN010163.

Summary of the Proposed Development

Steeple Renewables Project consists of a solar photovoltaic (PV) array electricity generating facility, Battery Energy Storage System (BESS) and associated infrastructure, which would allow for the generation and export of 600 megawatts of electricity located on land adjacent to West Burton Power Station in the administrative boundary of Bassetlaw District Council (the "Proposed Development").

The Proposed Development comprises nine connected land areas adjacent to West Burton Power Station. The Proposed Development will connect to the grid via the National Grid Substation at West Burton Power Station, which will transfer electricity into the national electricity network.

The main elements of the Proposed Development include:

- Solar photovoltaic panels and associated infrastructure (e.g. PV module mounting infrastructure, inverters, transformers and switchgear);
- Cable infrastructure (including high, medium, and low voltage power, earthing, communication, and control);
- Substation compound housing an onsite substation and control buildings;
- Battery Energy Storage System (BESS) compound house Battery Storage Enclosures (BSE) and associated infrastructure;
- Fencing and security measures;
- Internal access tracks and crane hard standings;
- Site entrances onto the highway;
- Temporary construction areas, worker facilities, compounds, and infrastructure;
- Landscaping including creation of new habitat areas;
- Permissive paths; and
- Biodiversity mitigation.

The Proposed Development is a nationally significant infrastructure project (NSIP) because it would be able to generate over 50 megawatts (MW) of electricity. This is an application made to the Planning Inspectorate and decided by the Secretary of State in accordance with the Planning Act 2008.

A map showing the location of the Proposed Development can be viewed on the Planning Inspectorate's National Infrastructure Planning website at the following address: <https://nsip-documents.planninginspectorate.gov.uk/published-documents/EN010163-000143-6.4.6%20Figure%206.1%20Site%20Location%20Plan.pdf>

If the DCO is made by the Secretary of State, it would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development. The DCO would also authorise the construction of temporary and permanent accesses to the Proposed Development, the temporary stopping up or diversion of

public rights of way, street works and highway works, and the application and disapplication of certain legislation.
