

Question 9.4.1: West Burton Solar Project Limited (WBSP) has been engaging positively with the Applicant in relation to the overlap of the Scheme with the West Burton Solar Project. As part of these discussions, WBSP requested that the protective provisions for its benefit are updated so that they apply to all West Burton Work Nos. that overlap with the Steeple project, not just the grid connection cable. WBSP understands that the protective provisions have been updated to accommodate this request, and this change will be included in the Applicant's revised draft Development Consent Order being submitted at Deadline 5. On this basis, the protective provisions for West Burton Solar Project are agreed.
