## 12. Relevant Designated Sites for Marine Ecology Receptors

12.1.1 There are five nature conservation designations (Special Areas of Conservation (SACs) and Sites of Special Scientific Interest (SSSI's)) with relevant marine / estuarine receptors within the study area. These designated sites are listed in **Table 1** and shown in **Figure 12-2: Designated Sites with Marine Ecological Features (EN010166/APP/6.3)**.

**Table 1: Relevant Designated Sites in the study area**
