

Please inspect, and consider the landscape impact from, public paths forming part of the Wales Coast Path. Also safety of crossing at proposed new road access entrance. Also path 28 near the power station site (a legal dead end) together with potential links to next rail overbridge north. Also path 32 on east bank of river Dee (another dead end) from near Hawarden railway bridge. Please inspect paths impacted by construction of pipeline.

For wider landscape impact from the Wirral, I suggest Burton Point - access from RSPB Burton Mere reserve.

For visual impact from Halkyn Mountain I suggest Moel Y Gaer summit and Billins trig point, both open access on foot.
