10 February 2026

Dear ██████████

**DOCUMENT REFERENCE: 9.10**

**EN010166 – APPLICATION BY UNIPER UK LIMITED FOR AN ORDER GRANTING DEVELOPMENT CONSENT FOR THE CONNAH'S QUAY LOW CARBON POWER PROJECT**

**EXAMINATION TIMETABLE DEADLINE 2 (10 FEBRUARY 2026)**

I write on behalf of the Applicant, Uniper UK Limited, to provide its Deadline 2 submission in respect of the examination of the Connah's Quay Low Carbon Power Project.

The Applicant's Deadline 2 submission can be downloaded using the link to the secure file share site below:

<https://dwd.ctit.co/url/ecb3kjwhhwxktpkx>

The Deadline 2 submission comprises the following documents:

1. Document Ref. 1.3 – Guide to the Application, Rev 04
2. Document Ref. 6.4 – Environmental Statement (ES) Appendix 11-M: 2025 Reptile Survey Report, Rev 00
3. Document Ref. 9.10 – Deadline 1 Cover Letter, Rev 00 – i.e. **this letter**
4. Document Ref. 9.11 – Applicant's Response to Deadline 1 Submissions, Rev 00
5. Document Ref. 9.12 – Geomorphological Walkover Survey Report, Rev 00 (provided in response to comments from Natural England (NE29) in its Relevant Representations at Deadline 1).

*Note: When referencing DCO documents, the Applicant has referred to the latest Connah's Quay Low Carbon Power Project Examination Library Reference. Where a document has been updated (or is a new document) at Deadline 2, and does not yet have an Examination Library Reference, the Applicant has used the Planning Inspectorate reference number and the Application document number (e.g. **EN010166/APP/9.12**).*

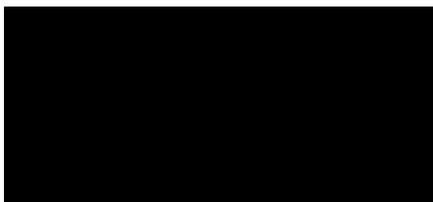

In addition to the above documents, various updates are being made to parts of the ES and supporting documents (clean and tracked documents are provided), for the reasons set out in brackets below:

1. Document Ref. 6.2.8 – ES Chapter 8 Air Quality, Rev 01 (a paragraph was corrected to note that further assessment by an ecologist is required for ammonia in the Abated FEED 2 scenario. This requirement had already been identified for the Abated FEED 1 scenario and is, therefore, covered in the ES ecology chapter).
2. Document Ref. 6.2.9 – ES Chapter 9 Noise and Vibration, Rev 01 (vibration predictions for the first floor receptors have been included in response to ongoing discussions with Flintshire County Council).
3. Document Ref. 6.4 – ES Appendix 8-A Baseline Air Quality Information, Rev 01 (this is updated to correct the NH<sub>3</sub> background concentration levels to match the latest Air Pollution Information System data).
4. Document Ref. 6.4 – ES Appendix 8-D Air Quality Operational Assessment, Rev 01 (updated to reflect edits made to ES Appendix 8-A, and, OE09 had been partially screened out in the Original ES, but following a comment from Natural England (NE62) in its Relevant Representation at Deadline 1, it was assessed further and the results were added to ES Appendix 8D. All impacts were screened out).
5. Document Ref. 6.4 – ES Appendix 13-D Outline Surface Water Drainage Strategy, Rev 02 (an update has been provided as noted in the Applicant's Cover Letter at Procedural Deadline A [PDA-002]).
6. Document Ref. 6.5 – Framework Construction Environmental Management Plan, Rev 02 (updated to reflect the vibration predictions for the first floor and Appendix 11-M: 2025 Reptile Survey Report).
7. Document 6.10 – Commitments Register, Rev 02 (to reflect updates in ES Chapter 9 Noise and Vibration, ES Appendix 13-D Outline Surface Water Drainage Strategy, and ES Appendix 11-M: 2025 Reptile Survey Report).
8. Document Ref. 7.20 – Indicative Access Design, Rev 01 (incorrect figure number updated).

The above documents can also be downloaded using the link to the secure file share site provided.

Should you have any questions, please do not hesitate to contact [REDACTED] [REDACTED]@dwd-ltd.co.uk; [REDACTED] ) or [REDACTED]@dwd-ltd.co.uk; [REDACTED] ).
