1. Introduction

1.1 Purpose of this Document

- 1.1.1 This Statement of Common Ground (SoCG) has been prepared to support the application (the Application) for the Connah's Quay Low Carbon Power Project (the Proposed Development) made by Uniper UK Limited (the Applicant). The Application was submitted to the Secretary of State for a Development Consent Order (DCO) (the Order) under section 37 of the Planning Act 2008 in July 2025. The Application was accepted for examination on 28 August 2025, and the Examination commenced on 13 January 2026.
- 1.1.2 This SoCG does not seek to replicate information which is available elsewhere within the Application documents.
- 1.1.3 SoCGs are an established means in the planning process of allowing all parties to identify and so focus on specific issues that may need to be addressed during the examination. This SoCG has been produced to confirm to the Examining Authority (ExA) where agreement has been reached between the parties and where agreement has not been reached.
- 1.1.4 This SoCG forms the final version of the SoCG and has been signed by both parties.

1.2 Parties to this Statement of Common Ground

- 1.2.1 This SoCG has been prepared between (1) the Applicant and (2) Eni (jointly referred to as the Parties) for Deadline 6 of the Examination.

The Applicant:

- 1.2.2 The Applicant is a UK-based company, wholly owned by Uniper SE (Uniper) through Uniper Holding GmbH. Uniper is a European energy company with global reach and activities in more than 40 countries. With around 7,500 employees, the company makes an important contribution to security of supply in Europe, particularly in its core markets of Germany, the UK, Sweden, and the Netherlands. In the UK, Uniper owns and operates a flexible generation portfolio of power stations, a fast-cycle gas storage facility and two high pressure gas pipelines, from Theddlethorpe to Killingholme and from Blyborough to Cottam.
- 1.2.3 Uniper is committed to investing around €8 billion (~£6.9 billion) in growth and transformation projects by the early 2030s and aims to be carbon-neutral by 2040. To achieve this, the company is transforming its power plants and facilities and investing in flexible, dispatchable power generation units. Uniper is one of Europe's largest operators of hydropower plants and is helping further expand solar and wind power, which are essential for a more sustainable and secure future. Uniper is gradually adding renewable and low-carbon gases such as

biomethane to its gas portfolio and is developing a hydrogen portfolio with the aim of a long-term transition. The company plans to offset any remaining CO₂ emissions by high-quality CO₂-offsets.

Eni:

- 1.2.4 Eni is an energy company operating in the UK. Inter alia, it owns and operates a number of existing pipelines across England and Wales.
- 1.2.5 Eni has existing gas apparatus within or adjacent to the Order limits for the Proposed Development and will act as an 'undertaker' for the purposes of works to its apparatus as part of the Proposed Development. Some of the existing apparatus will be decommissioned, which work will be carried out by Eni. Existing pipeline sections are to be re-purposed for use for carbon dioxide transportation; those pipelines will be transferred by Eni to Liverpool Bay CCS Limited, which is the company holding a carbon dioxide transport and storage licence under the Energy Act 2023.

1.3 The Proposed Development

- 1.3.1 The Applicant is seeking a DCO for the construction, operation (including maintenance) and decommissioning of a proposed low carbon Combined Cycle Gas Turbine (CCGT) Generating Station fitted with Carbon Capture Plant (CCP) (the 'Connah's Quay Low Carbon Power (CQLCP) Abated Generating Station') and supporting infrastructure (collectively 'the Proposed Development').
- 1.3.2 The CQLCP Abated Generating Station would comprise up to two CCGT with CCP units (and supporting infrastructure) achieving a net electrical output capacity of more than 350 megawatts (MW; referred to as MWe for electrical output) and up to a likely maximum of 1,380 MWe (with CCP operational) onto the national electricity transmission network.
- 1.3.3 The Proposed Development would make use of CO₂ transport and storage networks owned and operated by Liverpool Bay CCS Limited, that will transport CO₂ captured from existing and new industries in North Wales and North-West England, for offshore storage. The captured CO₂ will be permanently stored in depleted offshore gas reservoirs in Liverpool Bay.
- 1.3.4 For the purposes of the electrical connection, National Grid Electricity Transmission plc (NGET), which builds and maintains the electricity transmission networks, is responsible for the operation and maintenance of the existing 400 kV NGET Substation.
- 1.3.5 A description of the Proposed Development, including details of maximum parameters, is set out in **Chapter 4: The Proposed Development of the Environmental Statement (ES) (EN010166/APP/6.2.4)**. At this stage in the development, the design of the Proposed Development incorporates a necessary degree of flexibility to allow for ongoing design development.

1.4 Terminology

1.4.1 Section 3 summarises the issues that are 'agreed', 'not agreed' or are 'under discussion'.

1.4.2 These terms are used as follows:

- "Agreed" indicates where the issue has been resolved;
- "Under discussion" indicates where these points will be the subject of ongoing discussion wherever possible to resolve, or refine, the extent of disagreement between the parties; and
- "Not Agreed" indicates a final position where the Parties have agreed to disagree.

2. Record of Engagement

- 2.1.1 A summary of all meetings and correspondence that has taken place between the Parties in relation to the Application is outlined in **Table 1**. This includes email correspondence between the Parties to discuss sharing of information, arrangement of meetings and where appropriate to comment on draft documentation. **Table 1** reflects the key meetings and emails of note.

Table 1: Record of Engagement

Date	Form of Correspondence and Attendees	Key Topics Discussed and Key Outcomes
3 March 2025	Email between the Applicant and Eni	Arrangement of introductory meeting.
17 March 2025	Meeting between the Applicant and Eni	Introductory meeting for Eni to consider demolition approach for their assets on site.
15 May 2025	Meeting between the Applicant and Eni	Discussion of proposed demolition scope.
22 May 2025	Email between the Applicant and Eni	Email to share slides from introductory meeting.
15 July 2025	Email between the Applicant and Eni	Discussion of technical topics around the demolition proposal.
25 July 2025	Email from the Applicant's solicitors to Eni's solicitors	Sharing version of protective provisions to be placed on face of Draft DCO.
11 November 2025	Meeting between the Applicant and Eni (and Liverpool Bay CCS Limited (LBCCS))	Discussion of proposed demolition activities for the Eni assets.
15 December 2025	Meeting between the Applicant and Eni (and LBCCS)	Discussion of compulsory acquisition approach in the Repurposed and Proposed CO2 Corridors.
17 December 2025	Meeting between the Applicant and Eni (and LBCCS)	Discussion of proposed demolition schedule for the Eni Gas Reception facility and associated pipeline.

21 January-12 February 2026	Emails between Eni's solicitors and the Applicant's solicitors	Emails on a Protocol for engagement during the Examination.
26 January 2026	Meeting between the Applicant and Eni (and LBCCS)	Continuation of discussion of proposed demolition schedule for the Eni Gas Reception facility and associated pipeline.
3 February 2026	Email from Eni's solicitors to the Applicant's solicitors	Issuing a response on the draft protective provisions and cooperation agreement HoTs.
24 February 2026	Email from the Applicant's solicitors to Eni's solicitors	Returning the draft protective provisions.
25 February 2026	Meeting between the Applicant and Eni (and LBCCS)	Discussion of proposed issue of notification of demolition liabilities.
25 February 2026	Emails between the Applicant's solicitors and Eni's solicitors	Confirming position in respect of Examination Protocol and making arrangements for signing.
11 March 2026	Email from the Applicant's solicitors to Eni's solicitors	Sharing a draft cooperation agreement.
16 March 2026	Emails between the Applicant's solicitors and Eni's solicitors	Emails on the appendices to the draft cooperation agreement.
26 March 2026	Emails between the Applicant's solicitors and Eni's solicitors	Confirming agreed position on protective provisions and that these would be placed in the Draft DCO for Deadline 4.
9 April 2026	Meeting between Eni and the Applicant	Continued discussion of demolition interfaces on site.
9 April 2026	Email from the Applicant to Eni	Provide a list of actions from the previous meeting.
13 April 2026	Emails between the Applicant's solicitors and Eni's solicitors	Regarding signing of the Examination Protocol.
16 April 2026	Emails between the Applicant's solicitors and Eni's solicitors	Email confirming completion of the Examination Protocol.

16 April 2026	Emails between the Applicant's solicitors and Eni's solicitors	Providing an updated version of the cooperation agreement.
20 April 2026	Email from the Applicant's solicitors to Eni's solicitors	Providing an updated version of a schedule to the cooperation agreement.
20 April 2026	Emails between the Applicant's solicitors and Eni's solicitors	Engaging regarding the form of SoCG to be submitted at Deadline 5.
24 April 2026	Emails between the Applicant's solicitors and Eni's solicitors	Arranging technical and legal meeting.
29 April 2026	Meeting between the Applicant and Eni	Discussion regarding technical matters associated with a schedule to the cooperation agreement.
29 April 2026	Email from the Applicant's solicitors to Eni's solicitors	Providing updated version of cooperation agreement schedule following discussion.
5 May 2026	Meeting between the Applicant and Eni	Continued discussion of demolition interfaces and lease transfer
6 May 2026	Email from the Applicant's solicitors to Eni's solicitors	Providing updated version of cooperation agreement schedule following technical discussion.
6 May 2026	Email from the Applicant's solicitors to Eni's solicitors	Providing copy of third party protective provisions proposed for Schedule 13.
8 May 2026	Email from Eni's solicitors to Applicant's solicitors	Confirming agreement to cooperation agreement schedule.

3. Areas of Discussion between the Parties

3.1.1 Table 2 below details the areas of discussion and matters that are agreed and not agreed between the Parties.

Table 2: Areas of discussion between the Parties

Ref.	Subject	Relevant Application Document	Applicant Position	Eni Position	Status	Likelihood of resolution
1	Protective Provisions	Draft DCO (EN010166/APP/3.1)	The Draft DCO should include specific provisions for the protection of Eni.	The Draft DCO should include specific provisions for the protection of Eni as regards existing assets and infrastructure.	Agreed	N/A
2	Protective Provisions	Draft DCO (EN010166/APP/3.1)	The form of protective provisions currently included in the Draft DCO is now agreed with Eni, subject to a cooperation agreement being entered into.	The form of protective provisions currently included in the Draft DCO are agreed subject to a cooperation agreement being entered into.	Agreed	N/A
3	Authorised Development	Draft DCO (EN010166/APP/3.1)	The description of the authorised development in Schedule 1 of the Draft DCO (EN010166/APP/3.1) is agreed.	The description of the authorised development in Schedule 1 of the Draft DCO (EN010166/APP/3.1) is agreed.	Agreed	N/A
4	Land acquisition	Land Plans (EN010166/APP/2.2) Book of Reference (EN010166/APP/4.1)	The Applicant's approach to land acquisition is required for the delivery of the Proposed Development. The Applicant is progressing a change to the compulsory acquisition powers sought over the Proposed CO2 Corridor to reflect requests made by Eni. Details of the changes proposed are set out in the Change Notification [AS-006].	Eni has made some requests for changes which are being considered by the Applicant. Eni considers this issue is now resolved, subject to a cooperation agreement being entered into.	Agreed	N/A
5	DCO Articles and Requirements	Draft DCO (EN010166/APP/3.1)	The Draft DCO includes articles and requirements which are appropriate for the Proposed Development. The Applicant is liaising with Eni regarding how discharge of the requirements will be managed for each party's respective works under the Draft DCO. The position is secured through a cooperation agreement to be entered into.	The Applicant's approach to requirements in the Draft DCO is agreed. The requirements need to be allocated between the Applicant and Eni and be proportionate to the works each party will undertake under the Draft DCO and this has been done via the cooperation agreement. Eni has been discussing the requirements which are included in the Draft DCO with the Applicant to ensure that they are relevant and proportionate to the Eni works. The position is secured through a cooperation agreement to be entered into.	Agreed	N/A
