9. Please note that Hearings will be recorded, and the recordings will be published on the project page of the Planning Inspectorate's website as soon as practicable after each Hearing has taken place.

10. Any further Hearings (if required) will be publicised as required by the Planning Inspectorate and by the Infrastructure Planning (Examination Procedure) Rules 2010.

11. If any Hearing is no longer required then notification that a particular date is no longer required will be published as soon as practicable on the Planning Inspectorate's project webpage, providing reasonable notice to interested parties of the decision to cancel them.

Summary of the Scheme

12. The Application is for development consent to construct, operate, maintain and decommission a solar photovoltaic (PV) electricity generating facility with a capacity of over 100 megawatts (MW) and export connection to the National Grid. The Scheme comprises:

- Five solar array sites, Lime Down A, B, C, D, E (collectively the Solar PV Sites) located in Wiltshire which lie to the north of the M4, southwest of Malmesbury, between the villages of Alderton, Luckington, Sherston, Foxley, Norton, Corston, Startley, Upper Seagry, Lower Stanton St Quintin, and Hullavington;

- The Solar PV Sites will include solar panels, conversion units, inverters, and up to four 132kV substation located in Lime Down A, C, D and E. There will be one 400kV substation located within Lime Down D;

- One Battery Energy Storage System (BESS) areas, located within Lime Down D;

- A Cable Route Corridor within which underground export connection cables would be located to connect the Solar PV Sites to the National Grid at the existing Melksham Substation, as well as connecting each of the Solar PV Sites; and

- Associated infrastructure, mitigation and enhancement measures, and other ancillary works, for example, fencing, security, local grid connections, temporary access roads, permanent means of access, highway works, temporary works compounds and work sites.

The Scheme is located largely within the administrative area of Wiltshire Council, with small areas of existing highway within the administrative area of South Gloucestershire Council. The Solar PV Sites are located across several parishes:

- Lime Down A is located within the civil parish of Sherston, approximately 300 metres south of Sherston;

- Lime Down B is located within the civil parish of Norton, approximately 3 km southwest of Malmesbury;

- Lime Down C is located across the civil parishes of Sherston, Luckington, Hullavington, and Norton, approximately 830 metres east of Luckington;

- Lime Down D, which incorporates the proposed BESS area, is located across the civil parishes of Norton and Hullavington, approximately 480 metres west of Corston and 700 metres north of Hullavington; and

- Lime Down E is located within the civil parish of St Paul Malmesbury Without, approximately 150 metres northwest of Rodbourne.

A map showing the location of the Scheme can be viewed on the Planning Inspectorate's website at the following link: <https://nsip-documents.planninginspectorate.gov.uk/published-documents/EN010168-000563-2.1%20Location%20Plan.pdf>

13. Development consent is required to the extent that development is or forms part of a Nationally Significant Infrastructure Project (NSIP) pursuant to sections 14(1)(a), 15(1) and 15(2) of the Planning Act 2008. It is for this reason that the Scheme falls within the remit of the Secretary of State's decision-making powers.

14. The DCO, if granted, would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily. The DCO would also authorise alterations to the layout of streets, the construction of accesses to the Scheme, the temporary stopping up or management of the public rights of way, street works, removal of hedgerows and the application and disapplication of legislation.
