I wish to formally object to this proposal. It is a vast area of good productive agricultural land. The proposal has already been rejected by Wiltshire County Council as being invasive to the countryside and too large a construction. The project requires a long distance cable network to any locality where the electricity may be used, hence losses will occur and as it is, solar is only really effective in certain times of the year.

The scheme in this plan is unacceptable and other smaller scale developments including wind, are more appropriate to achieve sustainable energy solutions. To accept something of this vast scale would be like committing rural and community vandalism.
