I have already written in with my reasons for opposing this and will not repeat them but would like to add a request for consideration to be given to the extreme affect of the proposed development on my house and those of my neighbours.

Our houses will be surrounded on all sides by panels.

All roads nearby will be lined by panels.

Fields of panels will be visible from all sides of my house.

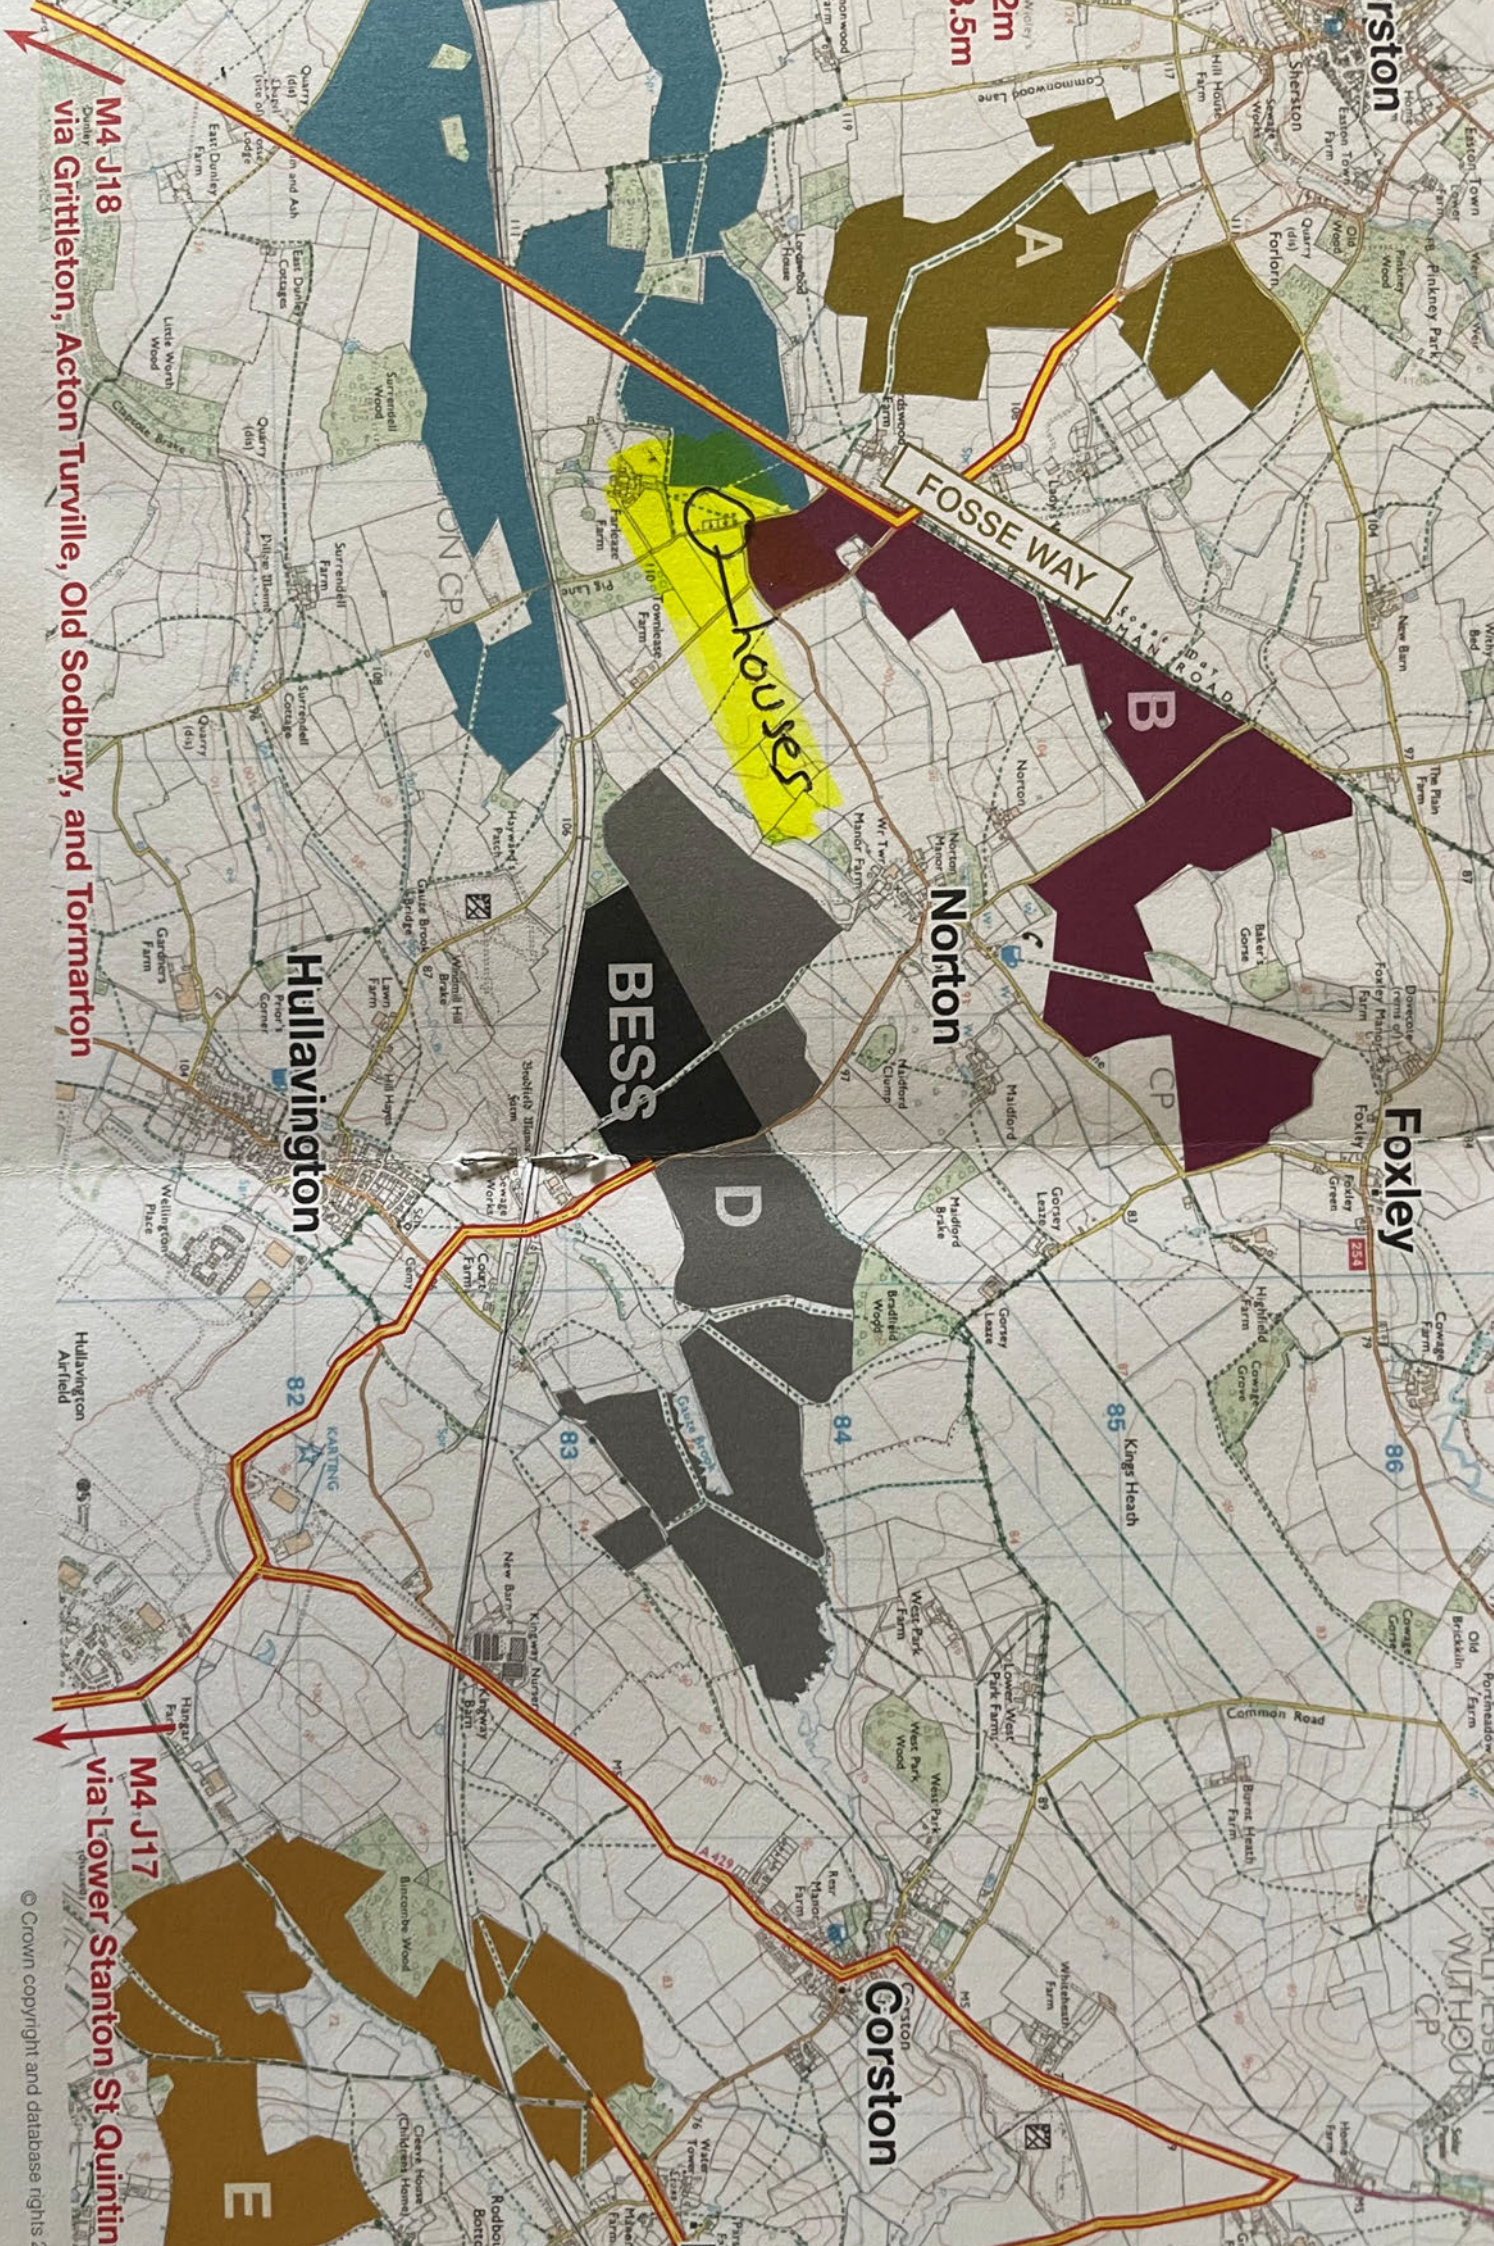

The battery storage area is but 3 fields away.

Are you aware of health risks being surrounded by panels?

This development affects my mental health and therefore my physical health through the immense stress imposed. Despite my best efforts to retain an independent and secure pension/old age this will be destroyed as my house will become unsaleable due to the close proximity on all sides by this development.

There is no benefit whatsoever to anyone living in the locality (except the farmers whose land will be leased) but there is extreme damage.

Regards
Karen Hallam
