

I gave oral evidence to the inspector

I followed that up with planning consents and plans for the inspector as requested.

I have received further communication from Lime Down and a further plan from them The plan they have now sent has not been altered from the original one in any way and so is still wrong .

I am now being asked to give them information about flooding in the area which has been significant problem .

I would have thought they would need to provide a flood risk survey.

I have replied to their communications but have received nothing in response

To say the least this is being handled in a highly unprofessional manner.

Unless anything changes regarding the approach by Lime Down I would wish to present oral evidence to the inspector at the next opportunity and before the enquiry is completed
