Date: 23 September 2026

Dear Sirs,

The Infrastructure Planning (Examination Procedure) Rules 2010 – rule 17

Application by Lime Down Solar Park Limited for an order granting development consent for the Lime Down Solar Project

Request for further information

We are writing under rule 17 of the Infrastructure Planning (Examination Procedure) Rules 2010, to seek further information/ clarification with respect to the following matters:

Generating output for the proposed development and relationship with the secured grid connection limit

Provide the predicted electricity generating output, expressed in megawatt hours (MWh) for the proposed development for every hour in a typical calendar year (365 days/8,760 hours duration). In answering this question, the applicant should provide calendar year predictions for:

- a) the total number of hours in a year when the proposed development would be expected to generate electricity in excess of the secured grid limit of 500 megawatts (MW) (paragraph 2.1.3 in the Grid Connection Statement [[APP-270](#)]); and
- b) the total number of hours in a year when the proposed development would be expected to generate electricity at levels below the secured grid connection limit, for each of the following percentage bands: 0 to 9; 10 to 19; 20 to 29; 30 to 39; 40 to 49; 50 to 59; 60 to 69; 70 to 79; 80 to 89; and 90 to 99%.

Your response should be submitted by **deadline 7 (2 October 2026)**.

Yours sincerely

Janine Laver
