[You don't often get email from [REDACTED] Learn why this is important at [REDACTED]]

Thank you for the invite to the 1st meeting. Being well into my retirement I have neither the tech nor the knowledge to handle teams etc. I would have liked to have had the chance to attend in person but sadly you have chosen to hold the meeting in the City of Peterborough which I would find difficult.

If I follow your notes this is really a case management meeting rather than dealing with actual issues so all is not lost.

Could I PLEASE however request that future meetings are NOT held in a City which is nothing to do with the proposal and far from convenient I suggest to the majority. May I take the liberty of suggesting you consider Springfields Exhibition centre on the outskirts of Spalding. Plenty of room, easy access and lots of parking. I have no association with them (last there for my 1st Covid job). The proposal relates wholly to land within the fens and the meeting should be in the fens. Locality would fully accord with the new PM's stated objects. Also I suggest there is one major issue missing from the agenda and I have raised this before. That is one of security. We all know of what is happening in Ukraine with regular attacks on energy infrastructure and now the same is happening in the middle east. We are warned of many risks to our own Country now and surely any matters of critical national infrastructure should consider defence implications/requirements as part of the planning procedure?

I am copying this to the minister who is in charge not only of Net Zero but, of importance, energy security.

Regards

Keith Tatnall
