1. List of Cumulative Schemes

1.1. Overview

1.1.1. This appendix provides the long list of cumulative schemes which have been identified on the basis of the search criteria set out within Table 1-1. The long list was updated in October 2026 to identify any new cumulative schemes that have come forward since the original long list was prepared, and to determine whether the status of any previously identified cumulative schemes has changed.

1.1.2. Cumulative Nationally Significant Infrastructure Projects (NSIPs), which meet the search criteria, are listed within Table 1-2. Planning applications submitted under the Town and Country Planning Act 1990 and other planning regimes are listed within Table 1-3. Allocations identified from local plans are set out within Table 1-4. Solar schemes within the administrative boundary of Lincolnshire County Council are listed within Table 1-5.

1.1.3. Table 1-2, Table 1-3 and Table 1-4 then conclude which cumulative developments have been short-listed for further assessment. All solar schemes above 1MW listed within Table 1-5 have been considered in the cumulative effects assessments for agricultural land use within **ES Chapter 5: Agriculture and Soils** (Doc Ref. 6.1) and **ES Chapter 16: Other Environmental Topics, Section 16.6 Materials and Waste** (Doc Ref 6.1).

1.1.4. Table 1-6 lists planning applications which were previously identified in the long-list of cumulative schemes in the Preliminary Environmental Information Report (PEIR) or have been raised as part of consultation feedback, however, have now been excluded from the final long-list of cumulative schemes. Reasons for their exclusion are also set out. These include applications where consent has been refused, applications which have been withdrawn, where planning permission has now expired or applications which have been assumed to form part of the existing baseline (and so are assessed as part of the baseline within the main chapters directly) due to the age of the application.

Table 1-1: Search criteria for the long-list of cumulative schemes

Type of Development	Size	Distance from Order Limits	Date of Consent (if granted)*
Nationally Significant Infrastructure Projects	n/a	30km	Within last 5 years (since 30 September 2020)
Town and Country Planning Act (TCPA) 1990[1] applications, Transport and Works Act Orders; Mineral and Waste EIA applications and allocations within Local Plans	Residential 10+ dwellings Residential development 0.5ha+ Development of floorspace 1000sqm+ Development of sites 1ha+ All refusals subject to appeal procedures not yet determined	15km	Within last 3 years (since 30 September 2022)
Solar schemes within administrative boundary of Lincolnshire County Council (LCC) (for agricultural land use and waste cumulative assessments)	n/a	LCC boundary	Within last 5 years for NSIPs and 3 years for other types of applications

* Note consents older than 5 years for NSIPs and 3 years for other types of applications have been excluded from long-list of cumulative schemes, as they have assumed to have been constructed, be under construction and completed prior to the construction of the Scheme starting, or the consent has expired.
