1. Introduction

1.1.1. This Navigation Document forms part of an application by Meridian Solar Farm Limited (the 'Applicant') to the Secretary of State under the Planning Act 2008 (the 'Act') for a Development Consent Order (the 'Application') for the proposed Meridian Solar Farm ('the Scheme').

1.1.2. The DCO Application is for a Nationally Significant Infrastructure Project (NSIP) comprising the construction, operation (including maintenance) and decommissioning of photovoltaic (PV) solar panels and up to 13 km of overhead line connection into National Grid's planned Weston Marsh substation. The Scheme will also include associated infrastructure, including co-located battery energy storage systems (BESS) and inter-array connections to link together the land parcels where the solar panels are located. The BESS is associated development to ensure that energy can be stored when it is generated and not demanded. The BESS will have a direct relationship with the solar PV panels and it will support the operation of this by storing electricity produced during times of peak capacity until it is needed.

1.1.3. The Scheme will also include associated infrastructure, including co-located battery energy storage systems ('BESS') and inter-array connections to link together the land parcels where the solar panels are located. The BESS is associated development to ensure that energy can be stored when it is generated and not demanded. The BESS will have a direct relationship with the solar PV panels and it will support the operation of this by storing electricity produced during times of peak capacity until it is needed.

1.1.4. The Scheme comprises a generating station of more than 100 MW and the installation of above ground electric lines greater than two kilometres in length. The Scheme therefore qualifies as an NSIP under sections 14(1)(a), 14(1)(b), 15(2) and 16 of the Act.

1.1.5. The purpose of this Navigation Document is to help the Examining Authority and Interested Parties understand the Application by signposting to the documents that make up the Application. It will be updated iteratively following the submission of the Application, both to capture the latest version of updated documents and to record new documents submitted as part of the Examination.

1.1.6. This Navigation Document makes reference to the below legislation and guidance which has shaped the content and form of the Application documents:

- Planning Act 2008;

- The Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009;
- The Infrastructure Planning (Environmental Impact Assessment) Regulations 2017; and
- Planning Inspectorate's Guidance: Nationally Significant Infrastructure Projects: Advice on the Preparation and Submission of Application Documents.

1.2. Application Volumes

1.2.1. The Application documents have been grouped into seven 'volumes' corresponding with the Planning Inspectorate's Guidance: Nationally Significant Infrastructure Projects: Advice on the Preparation and Submission of Application Documents.

1.2.2. The categories of the volumes are set out in Table 1-1. Following submission, an additional volume(s) will be added which will contain any new documents submitted after Acceptance or during the Examination.

Table 1.2-1 Application Volumes

Volume Number	Volume Name	Content
1	Application Forms	The completed Application Form, Cover Letter, Guide to the Application, Navigation Document, Section 55 Checklist and Electronic Application Index.
2	Plans	The plans, drawings and sections as required by the APFP Regulations and further plans provided to support the application.
3	Draft DCO	The Draft DCO sets out the legal powers that the Applicant is seeking. The Explanatory Memorandum explains the provisions in the Draft DCO. The application is also accompanied by the SI Validation Email and Schedule of Other Consents and Licenses for any remaining consents required beyond those powers enabled in the Draft DCO.
4	Compulsory Acquisition	The volume includes the documents setting out the land to be acquired or used for the Scheme, with reports justifying the seeking of compulsory acquisition powers and evidence to support the availability of funding to enable the acquisition,

Volume Number	Volume Name	Content
		including the Statement of Reasons, Funding Statement, and Book of Reference.
5	Consultation Report	The Consultation Report and its appendices set out the methodology and outcomes of the pre-application consultation undertaken on the Scheme.
6	Environmental Statement	The Environmental Statement and its appendices provide an assessment of the likely significant effects of the Scheme on the environment and a description of mitigation measures proposed to reduce any negative effects. Plans showing environmental features and proposed mitigation are also included.
7	Other Documents	The additional documents that support the DCO application, including the Planning Statement and its appendices, the Grid Connection Statement, and the outline management plans.
8	Post-Submission Application Documents	Additional documents to support the DCO application following acceptance.

1.3. Document Schedule

1.3.1. **Appendix A** of this Navigation Document provides a comprehensive document schedule which is duplicated in the Electronic Application Index (Doc Ref. 1.6). This is a 'live' component of this document and will be updated during the subsequent stages of the application process.

1.4. Document Reference Numbering

1.4.1. Documents are numbered in sequence with the respective volumes, with the volume number being the first digit of a document number. This is followed, where relevant, by the document number. For example, documents within Volume 1: Application Forms are numbered 1.1, 1.2, 1.3, etc.

1.4.2. The Environmental Statement ('ES') is contained in Volume 6 and comprises three parts; the ES Chapters, ES Figures and ES Appendices.

1.4.3. When new or revised documents are submitted during the Examination, these will be given a revision number alongside the document number. The revision number will be included at Appendix A.

1.4.4. This document should be read alongside information that is contained within the other application documents and plans.
