3. Green Hill Solar Farm (the “Proposed Development”) will consist of the following:
 - Green Hill A, A.2, B, C, D, E, F, G, and Green Hill BESS: eight solar array sites and a dedicated battery energy storage system (BESS) site. The solar array sites will include solar panels, conversion units, inverters and 132 kilovolt (kV) substations in Green Hill A, B, E, F and G, and two 400 kV substations, located in Green Hill C and Green Hill BESS.
 - A battery energy storage system at the Green Hill BESS and/or Green Hill C sites.
 - Underground electricity cables within a cable corridor connecting the Green Hill sites, substations and the energy storage system to the National Grid substation at Grendon.
 - Associated infrastructure, mitigation and enhancement measures, and other ancillary works including fencing, security, local grid connections, temporary access roads, permanent means of access, highway works, temporary works compounds and work sites.
4. The sites are located across several parishes and administrative areas:

 - Green Hill B is located within the parish of Holcot and in the administrative area of West Northamptonshire, approximately 1.2km northeast of Moulton.

6. Development consent is required to the extent that development is or forms part of a Nationally Significant Infrastructure Project (NSIP) pursuant to sections 14(1)(a) and 15(1) and 15(2) of the Planning Act 2008. As an onshore generating station in England with a capacity greater than 50 MW (AC), the Proposed Development falls within the remit of the Secretary of State's decision-making powers.
7. The DCO, if granted, would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily. The DCO would also authorise alterations to the layout of streets, the construction of accesses to the Proposed Development, the temporary stopping up or management of the public rights of way, street works, removal of hedgerows and the application and disapplication of legislation.

Environmental Impact Assessment Development

8. Due to its nature and size, the Proposed Development is classified as an Environmental Impact Assessment ("EIA") development for the purposes of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017. This means that the Proposed Development constitutes development for which an EIA is required. The Application is therefore accompanied by an Environmental Statement.
