Subject: Fw: Planning, Green Hill Solar Farm ENO [REDACTED]

Dear Sirs ,

We strongly object to the construction of this solar farm on the following grounds:-

1. The taking of vast acres of prime agricultural land out of production when we are already being warned of food shortages due to the political situation. There must be many places to put solar panels that don't involve loss of agricultural land, such as roofs of buildings.
2. The start of the farm is at close proximity to the village of Lavendon. There are deep concerns that this will increase the already large risk of flooding in the village that has occurred several times over the past few years, despite the local council plans which allegedly will alleviate some of the risks.
3. Has it been ascertained that the National Grid can actually utilise the electricity produced from such a vast acreage of solar panels.
4. The solar farm proposed will straddle the Three Shires Bridleways, a long distance bridleways, which is used on a regular basis by horse riders and walkers. This will become unusable during construction and totally spoil the rural nature of the area which at present is enjoyed by so many.

Kind regards,

Roger and Hazel Steels

Roger & Hazel Steels
