Subject: Fw: Objection to Greenhill Solar Project ENO10170

You don't often get email from [REDACTED]

Dear SOS

I am writing to raise my concerns regarding the above proposed project.

There are simply too many reasons why this project shouldn't go ahead yet I'm afraid common sense does not seem to be prevailing.

Surely solar panels are better placed on commercial/industrial building rooftops and acres of battery packs away from residential areas for the sake of environmental damage and fire risks. The UK government does recognise the potential hazards of these battery packs including toxic gases, electrolyte leakage, contaminated firefighting water and thermal runaway from lithium-ion systems.

Alongside the potential loss of beautiful agricultural land for the sake of ugly solar panels that will be imported from China. This could have long-term consequences that will be difficult to reverse. Losing prime agricultural land is foolish and is putting are food safety at tremendous risk especially in the current geopolitical instability state we are in.

The potential damage to our wildlife and biodiversity all raises huge concerns.

I hope this proposal can be retracted.

Yours faithfully

Sue Kirton
