Subject: Fw: EN0110012 – Change Application – Examination Timetable and Professional Representation

Good morning,

Further to the Rule 6(3) letter dated 14 October 2026, I would like to raise some concerns regarding the proposed changes and the examination timetable.

The revised access proposals near [REDACTED] now appear to affect another of our fields, including a corner where there is an established mature hedge. We have not been contacted or consulted about these proposals, and no discussions have taken place regarding what is intended or how our land may be affected.

I am also seeking clarification on whether the original proposal to use our existing access lane remains under consideration.

The existing permissive footpath, which we and our guests regularly use to walk towards Skipwith and The Drovers Arms, runs along the proposed new construction access route. No discussions have taken place regarding how this would be managed during construction, whether the footpath would remain open or what safe alternative would be provided.

As a registered Interested Party (RR-1444), I note the Examining Authority's statement that those affected by the proposed changes must be given a fair opportunity to express their views and have those views properly considered. However, my land agents, Bidwells, have advised that they are unable to represent us at the Examination Procedure Meeting on 21 October, as arrangements for recovering their professional fees remain unresolved with the Applicant.

Given that the revised proposals now appear to affect further areas of our land, I am concerned that without the necessary professional support, we are not being given a fair opportunity to properly assess the changes and respond to them. I would therefore like to ensure there is sufficient time for both myself and my land agents to review the revised proposals, obtain the necessary information and respond properly.

I would be grateful if these concerns could be brought to the attention of the Examining Authority when considering any amendments to the examination timetable.

Could you also please confirm whether these comments can be considered in writing, rather than requiring me to register to speak at Wednesday's meeting?

Many thanks,

Wendy Tomlinson
