Submission ID: [redacted]

In respect of change 7, whilst we welcome a buffer around our property, we still maintain that a 250m zone should be set around all boundaries as per the Botley West DCO and the red line boundary moved accordingly.
It appears convenient that the applicant appears to be able to pick and choose when a precedent should be applied, taking into account the fact that they have quoted several previous NSIPs / DCOs in their case for why their Change Requests should be accepted by the Examining Authority for examination, which is of course for their benefit.
All other outstanding comments from earlier representations still stand.
