# 1 Introduction

## 1.1 Purpose of this Document

- 1.1.1 This document provides a guide to the Development Consent Order (DCO) Application for The Drovers Solar Farm (the ‘Scheme’). The DCO Application is made by The Drovers Solar Farm Limited (‘the Applicant’) to the Secretary of State for Energy Security and Net Zero (the Secretary of State) pursuant to the Planning Act 2008 (PA 2008).
- 1.1.2 The Scheme comprises the construction, operation, maintenance, and decommissioning of a solar photovoltaic (PV) electricity generating station and Associated Development comprising Battery Energy Storage System (BESS), a Customer Substation, and Grid Connection Infrastructure, including a new National Grid Substation. The Scheme would allow for the generation and export of over 50MW Alternating Current (AC) of renewable energy, connecting into the National Electricity Transmission System (NETS) overhead line that passes through the Site.
- 1.1.3 As the Scheme would have a generating capacity in excess of 50MW, it is considered to be a Nationally Significant Infrastructure Project (NSIP) under the Planning Act 2008.
- 1.1.4 A full description of the Scheme is provided for in **Environmental Statement (ES) Chapter 5: The Scheme [APP/6.1]**.
- 1.1.5 This Guide to the Application provides an overview of the documents that have been submitted in order to satisfy the Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009 (the APFP Regulations), the Town and Country Planning (Environmental Impact Assessment) Regulations 2017 (the EIA Regulations) and section 37 of the PA 2008.
- 1.1.6 The APFP Regulations were updated in April 2024, and these updated APFP Regulations have been complied with within this DCO Application.
- 1.1.7 Regulation 5 of the APFP Regulations sets out the documents that all DCO applications must include. The APFP Regulations also provide at Regulation 5(2)(q) for the submission of “*any other documents considered necessary to support the application*” as well as at Regulation 5(2)(o) for “*any other plans, drawings and sections necessary to describe the proposals*”.
- 1.1.8 Regulation 6 of the APFP Regulations sets out the specific documentation required in support of draft DCO applications for particular types of development, including generating stations and grid connections.
- 1.1.9 The Scheme constitutes an Environmental Impact Assessment (EIA) development, and therefore the EIA Regulations and requirements contained therein apply.

- 1.1.10 This Guide to the Application is a live document which, where requested by the Examining Authority ('ExA'), will be updated following each examination deadline to reflect submissions made by the Applicant, capturing both the latest versions of updated documents and recording new documents submitted as part of the examination.

## 1.2 The Applicant

- 1.2.1 The Applicant is a 100% subsidiary of Island Green Power UK Projects Limited, which is in turn a 100% subsidiary of Island Green Power's UK group holding company, Island Green Power Group Limited (IGP). IGP is a leading international developer of renewable energy projects, with a focus on utility-scale solar projects and battery storage systems. IGP focuses on the entire project lifecycle of development from land sourcing, obtaining planning consents and permits and achieving grid connection with operations across the UK, Europe, Australia and New Zealand.
- 1.2.2 Established in 2013, with the founders operating for over 25 years in the energy market, IGP's mission is to help countries increase their solar energy usage, making more renewable energy possible whilst drastically reducing carbon emissions. IGP are committed to responsible land use, working with the belief that development and commercial delivery of solar farms can be achieved in harmony with their surrounds.
- 1.2.3 IGP have delivered nearly 40 solar projects worldwide that have generated more than 3 GW of energy capacity. This includes 21 solar projects in the UK. These range in size from below 5 MW to Nationally Significant Infrastructure Projects (NSIPs) such as Cottam, currently the UK's largest consented solar project. Cottam will generate 600 MW of clean, renewable and secure electricity and includes 600 MW of Battery Storage that will store then release energy as needed.

Non-Technical Summary
Commitments Register

## 10 Volume 7 – Other Documents

- 10.1.1 Volume 7 provides other documents which the Applicant has submitted to adhere to the APFP Regulations and/or which are considered by the Applicant to be required to support the DCO Application.
- 10.1.2 The **Grid Connection Statement [APP/7.1]** has been submitted in accordance with Regulations 5(2)(p) and 6(1)(a)(i) of the APFP Regulations. It outlines the details for connecting the Scheme to the National Grid.
- 10.1.3 The **Equality Impact Assessment [APP/7.2]** considers the potential equality impacts related to the DCO Application for the construction, operational, and decommissioning phases of the Scheme.
- 10.1.4 The **Shadow Habitats Regulations Assessment [APP/7.3]** sets out the screening report to determine whether or not development plans could negatively impact local plans on a recognised protected European site beyond reasonable scientific doubt.
- 10.1.5 The **Biodiversity Net Gain Assessment Report [APP/7.4]** presents the Biodiversity Net Gain Assessment which details the predicted biodiversity net gain that could be delivered by the Scheme.
- 10.1.6 The Applicant requires a range of consents and agreements to construct and operate the Scheme. As explained in the **Explanatory Memorandum [APP/3.2]** to the **draft DCO [APP/3.1]**, some of these are included in the draft Order. However, there are other consents from different regulatory organisations that will be required separately from the Order. The need for such consents and how they are to be obtained is explained in the **Consents and Agreements Position Statement [APP/7.5]** required under other legislation.
- 10.1.7 The **oCEMP [APP/7.6]** sets out the measures that will be included in detailed Construction Environmental Management Plan(s) to control potential environmental and amenity impacts of construction. In addition, the management plan provides a framework for construction environmental controls.
- 10.1.8 The **oCTMP [APP/7.7]** sets out the measures that will be provided in detailed Construction Traffic Management Plan(s) for the traffic generated during the Scheme's construction phase.
- 10.1.9 The **oOEMP [APP/7.8]** sets out the measures that will be included in detailed Operational Environmental Management Plan(s) to control potential environmental and amenity impacts of the operation of the Scheme. In addition, the management plan provides a framework for operational environmental controls.

- 
- 10.1.10 The **oOTMP [APP/7.9]** sets out the measures that will be provided in detailed Operational Traffic Management Plan(s) for the traffic generated during the Scheme's operational phase.
- 10.1.11 The **oDS [APP/7.10]** sets out the measures that will be included in detailed Decommissioning Strategy(ies) to control potential environmental and amenity impacts of the Scheme's decommissioning phase. In addition, the management plan provides a framework for decommissioning environmental controls.
- 10.1.12 The **oLEMP [APP/7.11]** provides a framework for delivering the green infrastructure elements of the Scheme for the pre-construction and operational phase of the Scheme including the successful establishment and future management of the proposed landscape and ecological works for the duration of the Scheme's operational phase.
- 10.1.13 The **oPRoWPPMP [APP/7.12]** outlines how the public rights of way network and permissive paths will be managed by the Applicant in relation to the Scheme. This is to ensure that they have been suitably considered and are able to operate, in terms of both user safety and accessibility, during the construction, operational, and decommissioning phases of the Scheme.
- 10.1.14 The **oSMP [APP/7.13]** sets out the measures that will be included in detailed Soil Management Plan(s) and will include measures for soil handling, soil moisture content assessments and storage and trafficking of soils during the construction, operational, and decommissioning phases of the Scheme.
- 10.1.15 The aim of the **oBSMP [APP/7.14]** is to define the proposed safety strategy, requirements, and processes necessary to meet derived safety objectives and to set a level of safety performance that the installation is to be measured against.
- 10.1.16 The **oESSCS [APP/7.15]** outlines how the Applicant would promote the delivery of economic benefits generated by the Scheme to local people and businesses across Norfolk.
