	Ground Level (mAOD):	67m	Paper Size:	841mm x 297mm (Half A1)	Camera Model and Sensor Format:	Canon EOS 6D, FFS				REVISION	P1, Text update	DRN	JB	CHK	OWh/MB	APP	RP
	Direction of View: bearing from North (0°):	225°	Enlargement Factor:	96%	Lens Make, Model and Focal Length:	Canon EF50mm f/1.8 STM				DWG NO	9485_0522	DATE	06/01/2026	Sheet 2 of 4			
	Distance to Site:	0m	Visualisation Type:	Type 1 (for context)	Height of Camera Lens above Ground (mAOD):	1.5m											

Note 1: The 3D wireline blocks demonstrate the scale and siting of the maximum development parameters, without the screening effects of new mitigation planting.
Note 2: The exact siting of the larger infrastructure, such as the Customer Substation, National Grid Substation and Grid Connection Infrastructure will be defined at the detailed design stage. These Photowire visualisations have been modelled to show the full extent of the Works Areas as shown on the Works Plans [App 2.3]

Note 3: Solar PV Array development has been modelled at 4.5m high, which assumes all Solar PV Array development as being Single Axis Trackers at maximum inclination, to demonstrate the worst-case scenario. In reality, the Single Axis Trackers Solar PV Array would likely vary in height throughout the day as the sun moves above the Site and the inclination of Single Axis Trackers Solar PV Array reduces; therefore appearing less than 4.5m high.
Note 4: Grid Connection Infrastructure modelled at a maximum height parameter of 55m from ground level. Breaks in the parameter line are present where different areas of the parameter are visible within the Order Limits. This height parameter takes account for variations in existing topography and required ground levels for new electricity pylons. In reality, all new Grid Connection Infrastructure would likely be no higher than the existing 400kV overhead lines and pylons.

Wireline (Left)

LDĀDESIGN

Camera Location (OS Grid Reference):

578841 E 313687 N

Ground Level (mAOD):

67m

Direction of View: bearing from North (0°):

135°

Distance to Site:

0m

Horizontal Field of View:

90° (Cylindrical projection)

Paper Size:

841mm x 297mm (Half A1)

Enlargement Factor:

96%

Visualisation Type:

Type 3

Photo Date / Time:

29/01/2025 13:30

Camera Model and Sensor Format:

Canon EOS 6D, FFS

Lens Make, Model and Focal Length:

Canon EF50mm f/1.8 STM

Height of Camera Lens above Ground (mAOD):

1.5m

This wireframe is based upon LiDAR digital terrain data with spot heights at 1m resampled to 5m (which does not precisely model small scale changes in landform or sharp breaks in slope).

The three dimensional model of the development is based on [ES Figure 5.1: Concept Masterplan \[APP 6.3\], 9485_0250_G_Concept_Masterplan](#).
