| <b>APP/8.12</b>               | Applicant's Response to Local Impact Reports (LIR) <b>BCKLWN 34-35</b>  | The Applicant has responded to the BCKLWN LIR points 5.1.1 and 5.3.1-5.3.3 on contaminated land and confirmed agreement.                                                                                                                                 | Comment 5.1.2 appears to refer to air quality and may belong in section BCKLWN38.                                                                                                                                                                                                                                                                                                                                   |
| <b>APP/8.12</b>               | Applicant's Response to Local Impact Reports (LIR) - <b>BCKLWN36-37</b> | The Applicant has responded to the BCKLWN LIR points 5.4.2 to 5.4.5 that related to construction dust risks and monitoring. The Applicant has confirmed in APP/8.12 that this is agreed and will be discussed with relevant local authorities as needed. | The Applicant has confirmed in APP/8.12 that this is agreed and will be discussed with relevant LAs as needed. However, Appendix 1 of the oCEMP (APP/7.6.2 (Revision 2)) previously included the dust assessment and mitigation measures as referred to in the Applicant's response to the LIR and this has been removed from the most recent version of the document. This should be re-instated within the oCEMP. |
| <b>APP/8.12</b>               | Applicant's Response to Local Impact Reports (LIR) - <b>BCKLWN23</b>    | The Council acknowledge an excel version of the BNG metric directly from the Applicants as referenced in their LIR response.                                                                                                                             | There are two inputs within the Onsite Habitat Enhancement (Tab A-3) six are inputted as Formally Identified in Local Strategy. It is not agreed that Cell E23 (Habitat Ref W22a) Formally Identified in Local Strategy for the habitat enhancement proposed. This area is covered by a polygon for Still Water Restoration rather than woodland measures.                                                          |
| <b>REP1-052/053</b>           | 7.7.1 outline Construction Traffic                                      | In our response to Deadline 1 Submissions (REP2-030), the Council made specific                                                                                                                                                                          | BCKLWN Request a response from the Applicants.                                                                                                                                                                                                                                                                                                                                                                      |
