

I understand that there are meetings scheduled at which residents ,directly affected by the East Pye Solar development, may voice their concerns. I have submitted several emails regarding the extremely negative impact that this project has had on my home, my stress levels and my family - not to mention the negative impacts on the local wildlife, footpath and village at large. As information has be somewhat limited regarding the complaint process please confirm that you have received my concerns and acknowledge them. Unfortunately , I am out of the country during the scheduled meeting but wish my distress to be clearly noted and I wish to be considered for special consideration should this abomination be approved ! Our lives and our future has been scuppered by these proposals and we are feeling it in a very real, visible and financial way with apparently little ' comeback or appreciation . We are concerned about the safety and peace of our home which we have worked and sacrificed so hard for. We are worried about the noise & very real fire risk given the close proximity to our home and garden. My elderly Father in Law who lives with us and is very ill deserves peace in his later years and that's what we thought we were offering him , when he came to live in the Annex at our rural property ! To say we are all stressed and devastated is an understatement.

Please let me know how our voice will be heard and our very real loses allayed?
