

Dear Inspector

I believe that the project is an inappropriate development for this area, being too extensive and near to existing villages. I believe the road and neighbourhood infrastructure will not support it and any enlargement would erode the fabric of our area. Having seen the development North of Long stratton, I question the wisdom of destroying the remaining rural corridor.

I do not believe Maquirie should have any involvement as the track record at Thames Water highlights a policy of debt loading and asset stripping rather than any green agenda.

I also worry that due to the elderly demographic of the area, voices are not being heard due to technological knowledge gaps and a complex procedure.

I hope that you will put the feelings of the local community first and not those of big business who view green space as unproductive to be exploited and do this hiding behind a green agenda.
