

Much concern has been raised re dangers to wildlife. I want to draw attention to how solar farms would destroy our 'soil'. F D Roosevelt claimed 'The nation that destroys its soil destroys itself.' Mahatma Gandhi warned 'To forget how to dig the earth and to tend the soil is to forget ourselves.' And Charles Kellogg claimed 'Essentially all life depends upon the soil. There can be no life without soil and no soil without life.' So, dramatic as it might sound, to cover our soil with aluminium and glass panels which would remain in place for years will, in Charles Kellogg's words, lead to '..no life..'. To go ahead and cause such destruction would go against all perceived wisdom and experience, it must not be allowed to go ahead. We have only one land and it must not be taken away from us, it should be cherished and nurtured.
