We live just meters away from the east Pye suggested scheme in Great Moulton. Lived here 35 years. With lovely views which will be spoilt. Risk of flooding, noise, increased house insurance, fire risk, disturbance for 2/3 years. Lights, glare, noise, camera, view spoilt, house de valuation/ unable to sell during or after completed. Wildlife forced away. Continued increase in traffic during and after the completion. Our proximity means we will suffer the most. Anxiety and mental strain Niw and will heighten if this goes ahead. It's not just panels, noise glare etc but batteries, and a site near to us to be manned. I strongly oppose the scheme and especially the close proximity to our peaceful family home.
