

I wish to object to this project on the basis that I already have to tolerate solar panels just a few hundred yards from where I live and run my health and wellbeing business.

I chose the location for my business and it's also where I live on the basis that it is a quiet rural location with a large amount of wildlife. My business is helping people with their physical and mental health. I am already seeing first hand the effects on peoples health due to the impact of this project. I have also lost clients because they have moved house due to the threat of this project. I am not against solar power but I know from the research I have completed that there are other and more beneficial methods of achieving net zero. I do not support the East Pye Project.
