

This land should be kept for agricultural use. We cannot continue keep importing our food & if this solar farm goes ahead we will be even more dependent on imports. We need food security in this very troubled world.

Also the area is beautiful as it is but not with thousands of solar panels everywhere. These should be placed on new houses, schools, factories, public buildings etc. The countryside is going to look awful and it makes me extremely sad for my grandchildren that this may be the case. PLEASE DO NOT GIVE PERMISSION FOR THESE TO BE BUILT
