

East Pye Solar

I am a local resident and a retired solicitor. I strongly object to this project

My reasons being:

2700 acres of mainly grade 2, described as “very good quality” agricultural land, We need to retain our land in times of global uncertainty.

Significant infrastructure and disruption caused with Battery Energy Storage System, Substations. Grid Connection, Cable Route Corridor. Plus ancillary works such as Security fencing. Impact on residents because of compulsory purchase of land held for many many years. The height at 15 ft is a serious concern (stand up and say 3 times my height)!

I am NOT IMPRESSED with the ULTIMATE OWNERSHIP of Easy Pye Solar by Macquarie Asset Management who paid 79.8 million dollars to cover federal [REDACTED] I believe SUSTAINED in the US. They are Australian.

What is the reality after 30 years of lifespan, Removal. Replacement? By who??

It is inappropriate to call it a FARM, Oxford English definition of which is “An area of land and the buildings on it used for growing crops and or keeping animals” whereas A Factory is an Industrial facility like this proposal!!

- It is not democracy to override local opinion and I very much hope the Planning Inspectorate will not do so in connection with their decision about this project.
