

Objection to East Pye Solar, South Norfolk. Written representation adding to my original relevant representation submission .

After having to cancel attending the open floor hearings personally due to unforeseen circumstances, apologies were sent via email and by calling. I have listened to all the recordings over those days. I would just like to add to my original statement.

I am hoping that since you have driven the route my earlier comments about where we live on the B1527 brings a better understanding of the area. The unsuitability of the road and our close proximity to it and to the even smaller lanes around us off this. Noise and damage to the roads, buildings and the safety aspect.

Of great concern would also be noise from the structures / equipment from low frequency humming /buzzing noise from inverters, transformers and cooling fans. I feel our health would be greatly affected and stress levels would be higher if this proposed plan is given the go ahead. The stress levels are bad enough now with the worry this has caused my family. Long term stress levels do incredible damage to the body and mind.

We support our local businesses in all of our small villages and communities surrounding us . We want them to survive for their community spirit, their employment and what they offer us the residents locally and the visitors that come to the area. To hear one of our local café /farm shop owners giving her oral representation, I think it gives you a better feel of what's happening to people's livelihoods and how it's affecting us all as residents.

If this proposal went ahead, how would this impact my family - greatly is the answer.

We would lose everything we hold dear : Open countryside and views. The sight and sounds of our wildlife and the peace that brings us. Dark night skies. Disruption to our daily routines and lives. Our well being.

If it went ahead we would be surrounded in all directions and it feels overwhelming because of the size and scale of this proposed project. We strongly object to this proposal and for all the reasons stated on both statements June and October we ask that you refuse to let this project go ahead.
