

My heart is broken when I envisage what might be forced on our lives. It is hard to overstate how much grief and anger I feel.

South Norfolk is a beautiful county which has already taken its fair share of infrastructure and in deed we have the Norwich to Tilbury pylon route, proposed. The Tasway Energy Park 3,600 acres, sleeping. A 5,000 acre solar park in Gissing, proposed. There are many more as well as ones already under construction in Attleborough and Palgrave. Norfolk is the latest Gold Rush for foreign investment.

The villages proposed in the East Pye solar are beautiful historic and architectural delights which have grown up over the centuries. The villages are situated in picturesque countryside and are very close to each other and can be walked to and from the network of footpaths crisscrossing South Norfolk. They being made by villagers long gone who had no transport and took the most direct route across fields to the next village. It is a unique feature of this landscape and myself and my husband walk various footpaths everyday for exercise and the pure enjoyment of the landscape and wildlife. This is why we live in South Norfolk.

To take this away, the peace, the dark skies, the wildlife which abounds would be like a death sentence, akin to living in a prison.

Please hear our feelings from the bottom of our hearts and refuse this monstrosity.

I haven't even touched on food security and the financial affect this would have on peoples homes and rural businesses which contribute hugely to the economy.

I lay awake at night worrying
