

I am really concerned about the impact of the East Pye Solar Project. It is going to cause a lot of disruption to the area and will ruin the countryside and wildlife which is why I particularly moved here. I am worried about the future and how this would affect property values and being able to sell in the future if this goes ahead. The loss of farmland is another huge concern especially as the project is such a large proportion of South Norfolk and already there are other projects resulting in loss. It will affect local journeys to work and school as well. It will be a terrible outcome if this project goes ahead.
