2nd October 2026

Your Ref EN0110014 (My Ref number [REDACTED])
INT. PARTY REF. [REDACTED]

Objection to East Pye Solar my comments to add after the open floor hearings in September 2026 at Dunstan Hall.

To add to my previous statement. I was born in Norwich and chose to move back here later in life to enjoy all that it has to offer. An area of open views of countryside, an abundance of flora and fauna that I need to feel well and balanced in my daily life.

Many visitors come to this area for those exact same benefits, to be in green spaces with nature and the sounds of nature and the uplifting effects those environments give them.

I can honestly say the months of thinking about this proposal and listening to the proposed plans has caused untold stress, worry and sleepless nights.

My home is on the [REDACTED] right on the road. You can see by my postcode.

Area 5, I will be surrounded !

Substation , solar panels and cable corridors.

I can't imagine ever having any peace again if this proposed plan is agreed.

It will devastate and destroy the area and all the surrounding villages around us.

I dread it for so many reasons.

The road (B1527) is very narrow in parts with bends, you would have seen this on your driving route in July.

Other roads off this are single roads with passing places.

The noise being so close to the road, the heavy loads, pollution, vibrations, damage to the road and property.

The sheer scale of this proposed project 2700 acres, it's enormous.

Then to hear at the hearings about compounds that would be created , lighting, fencing and that there are other projects being proposed or on hold in the area.

Hearing the applicant East Pye say "desktop" computer rather than visual on site or in person assessments.

I believe that's what I heard and my understanding of it.

It doesn't make any sense to me that someone can assess and make assumptions without knowing and seeing what they are talking about. It's people's lives and livelihoods that are being affected here. It also seemed that there were a lot of grey areas and the answer from the applicant was "that's been covered in this document" or "that complies with " .

As residents living here we need more detail and I don't think companies should be allowed to get away with bare minimal responses, for me this would be life changing if it were to go ahead.

Many residents can't sell their properties because of this proposal being in place and I am also concerned about what this will do to the value of property .

There are so many lives and livelihoods that would be affected if this proposed plan gets approval.

I have noted that other people have also made reference to Catagory 3 registration in their statements and the book of reference, it doesn't seem to be noted even if you have asked and written in twice!

For me this proposed plan is devastation for this area and for the health of so many residents.
