Submission ID: S7DD98A5E

As a local resident I very, very strongly object to the East Pye Solar development. The destruction of thousands of acres of the most beautiful area of Norfolk is a national disgrace. The development must be scrapped in its entirety and the land used for agreculture, as intended. If you want solar power it makes much more sense to mandate that all new builds incorporate solar pannels in the roof combined with small scale battery storage. This project is not needed.
