[redacted] from the village of Great Moulton and has written the attached personal impact statement. We forget about the [redacted]ple and I think it important that this [redacted] voice is heard.

Hello, [redacted].
I have been living in great moulton for almost 10 years. Iv always loved these beautiful walks and fields they are a memory in my heart and always will be. I found out about this devastating news around a year ago. My heart dropped I felt like I wanted to cry. I cant imagen these myjestic fields full of solar panhels. Once I got told about the company I felt furious. East pye solar farm needs to think again. there are plenty other places you could put these solar pannels. For example places where people have already destroyed, like buildings in towns and cities. Theres no point in destorying another piece of beauty. Loads of those resedints walk down or past the fields and see wild animals and crops growing, fresh grass and other beautiful things. I bet knowone would want to see these solar pannels all over the fields. where would all the animals live? this compary might start destroying natures homes. So please east pye solar farm. DONT RUIN OUR FIELDS!
