Submission ID: S64E4DF6E

I am an [redacted]. I work on [redacted]. I believe wholeheartedly our energy infrastructure has been neglected for decades & I am completely in favour of additional solar, wind & tidal resources being added to our Power Grid. But the location chosen here cannot be condoned. It fundamentally changes the nature of the village for ever more. It's currently a truly beautiful open area of farm land, Our ability to be self sufficient, with regard to food, is also a neglected essential. I cannot conceive of a reason to industrialise working farm land & ruin a village's rural ties for generations to come, rather than extending out from the North Anston Trading Estate & Monks Bridge areas which are already significantly developed. Thank you for your consideration in this matter.
